

Mergers & Acquisitions 2025.2 | AgroInsper

In Partnership with XP Investimentos

Manager: Venâncio Freitas

Team Leader: Gustavo Brandt

Diego Camargo | João Antônio Paiva | Sofia Carlota | Yasmin Cavalheiro

Summary

BrasilAgro is one of the largest companies in Latin America focused on the acquisition, development, and commercialization of rural properties. The company combines real estate appreciation with agricultural production, creating value through operational efficiency and land development

Proposed Transaction

Total sale of the company

Company Overview

Operates in grain, sugarcane, livestock, and forestry, as well as land transformation, with focus on underutilized areas. **With presence in 7 Brazilian states, as well as Paraguay and Bolivia.** And the land structure is **divided into own operated areas or leased areas.** **Listed on B3** (Brasil, ticker AGRO3) and **NYSE** (United States, ticker LND)

Communication

All inquiries, requests or any communication regarding this transaction shall be directed exclusively to the M&A team below. For any other reason, the shareholders, executives, employees, or related parties shall not be contacted directly

Combination of Agricultural Production and Land Sales

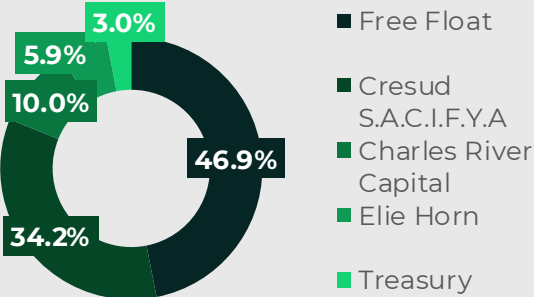

Company Insights

Overview

Founded in 2006, **BrasilAgro** is one of the **largest owners of arable land in Brazil**, focused on **acquiring, developing, and selling farms** with high appreciation potential. Its strategy **combines capital gains with operational efficiency** through the production of grains and other agricultural crops while holding the land

Cap. Table

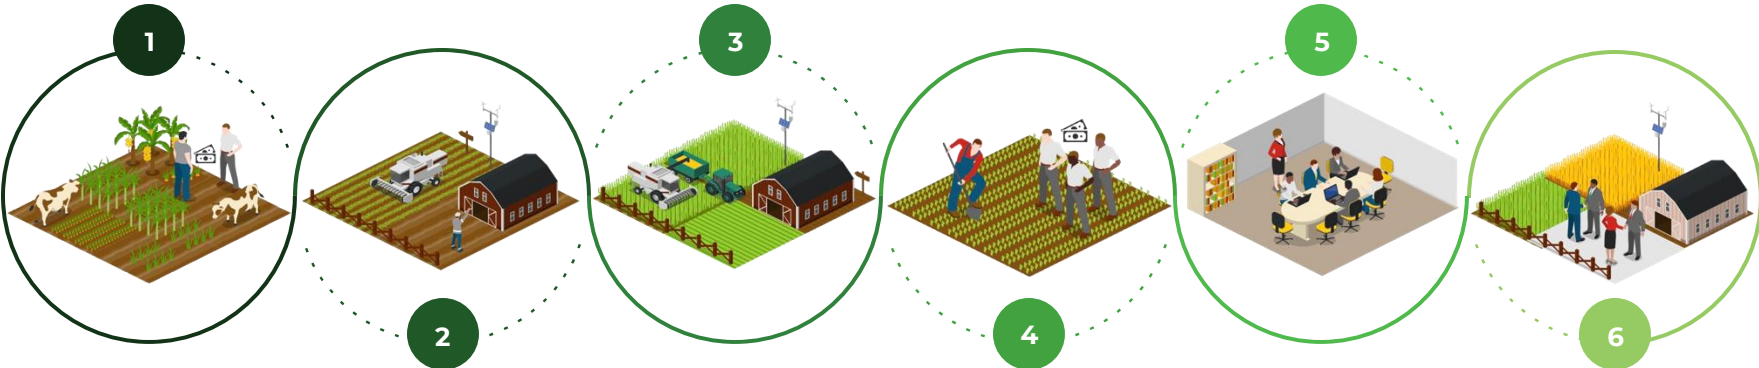

Key Financials (in R\$mm)

Market Cap	2.140,00
Total Revenue	1.058,00
Net Profit	226,87
ROE	10,41%
FCO	79,42

IV. Business Model

From land acquisition to farm sales, including crop production on both owned and leased land

1 Farm acquisition

The company acquires properties with high potential, focusing on underutilized or non-productive areas

2 Property development

Investments in infrastructure and technologies, combined with thorough field assessments

3 Production

Once developed, the farm begins producing soybeans, corn, sugarcane or livestock to generate cash flow

4 Management and leasing other land

BrasilAgro manages some farms directly and leases others to third parties, generating revenue in both cases

5 Reappraisal and valuation

Properties undergo an annual reassessment to ensure accurate and up-to-date valuation

6 Farm sale

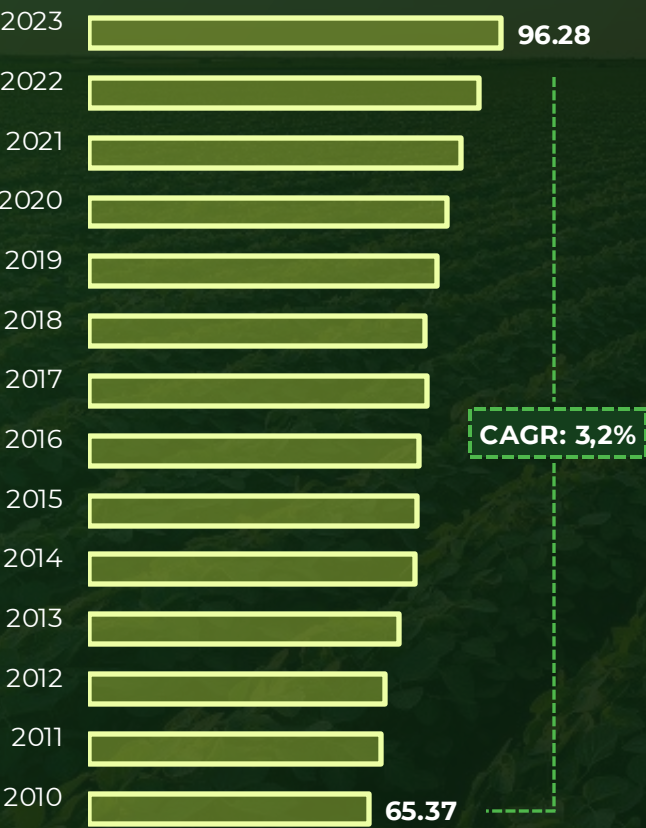

Once the farm reaches peak value and productivity, it may be sold to release capital for new acquisitions

Brazilian Agribusiness Expansion

Brazil's Expanding Agricultural Frontier

Land use has grown steadily, driven by productivity gains and technology adoption

Agricultural Area in Brazil: Expansion Driven by Productivity and Technology (million hectares)

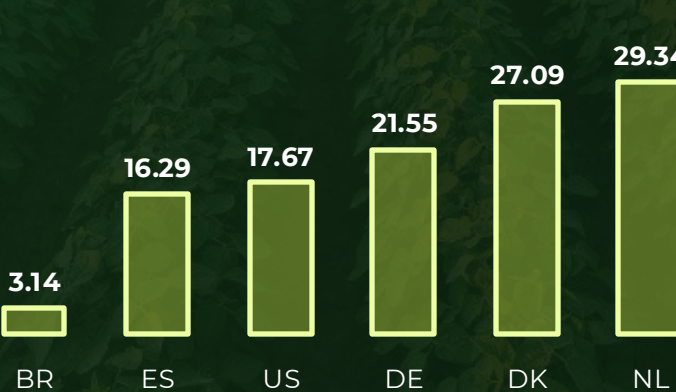

Brazil's Global Farmland Advantage

A unique combination: vast arable land and low production costs strengthens Brazil's role globally

Global Distribution of Arable Farmland: Brazil's comparative advantage (Million/ha)

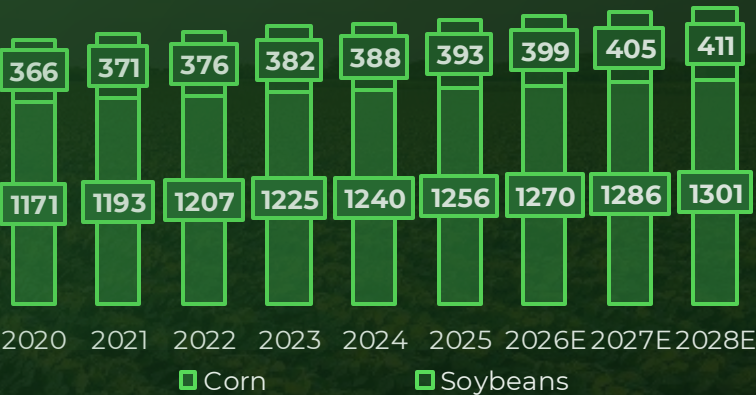

Low agricultural production cost (US\$/hour)

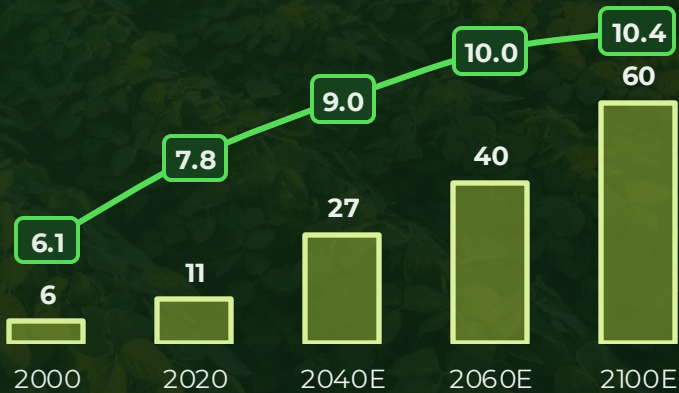

Global Demand Fuels Agribusiness Growth

Rising food consumption, driven by income and population growth, underpins long-term demand

Rising global demand drives Brazilian agribusiness growth (mmTons)

Growth in GDP per capita (thousand USD) and population expansion (Billion) boost food demand

Investment Theses

Winning Business Model

Resilient model combining crop diversification, productivity growth, and land appreciation

A Resilient Growth Model for BrasilAgro

Balancing land cycles, climate exposure, and low-capex strategies to drive sustainable returns and capital efficiency

Strategic Growth Avenues

Market consolidation, pasture conversion and LatAm expansion

Investment Theses

Winning Business Model

Resilient model combining crop diversification, productivity growth, and land appreciation

A Resilient Growth Model for BrasilAgro

Balancing land cycles, climate exposure, and low-capex strategies to drive sustainable returns and capital efficiency

Strategic Growth Avenues

Market consolidation, pasture conversion and LatAm expansion

I. Turning Land into Value: Core Strategy in Action

The Chaparral case illustrates the company’s business model — from strategic acquisition to transformation and high-yield monetization

“We remain committed to growing with excellence, strengthening our leadership position in the agricultural sector, while **turning challenges into opportunities for success and sustainable long-term growth.**”

CEO, André Guillaumon

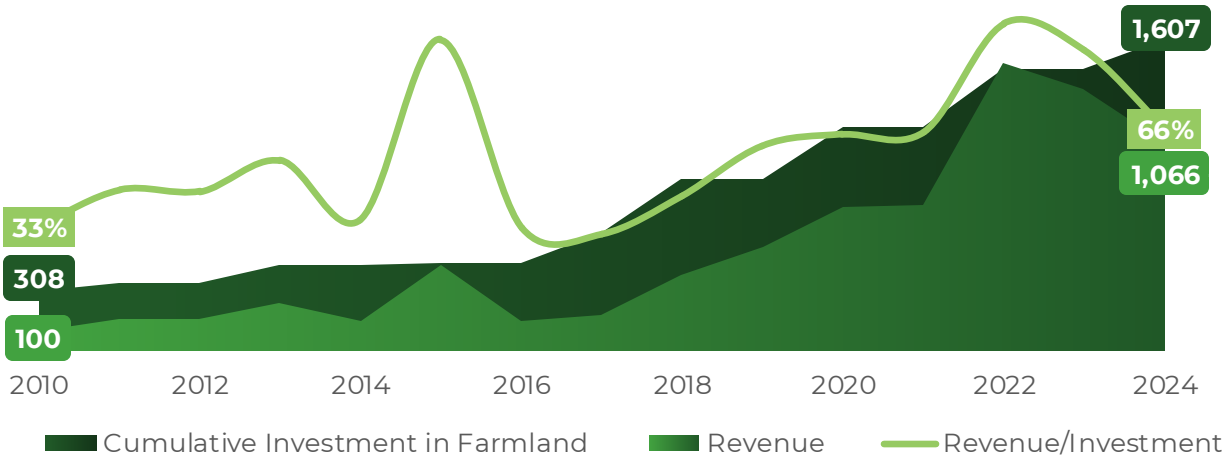

Through years of **development**, R\$ 125 million were invested to enhance productivity and infrastructure

The **acquisition** of Chaparral in 2007 targeted a high-potential asset in a strategic frontier region

The **monetization** came in Mar/2024 with a partial sale at R\$ 364.5 million, delivering a 15.0% IRR

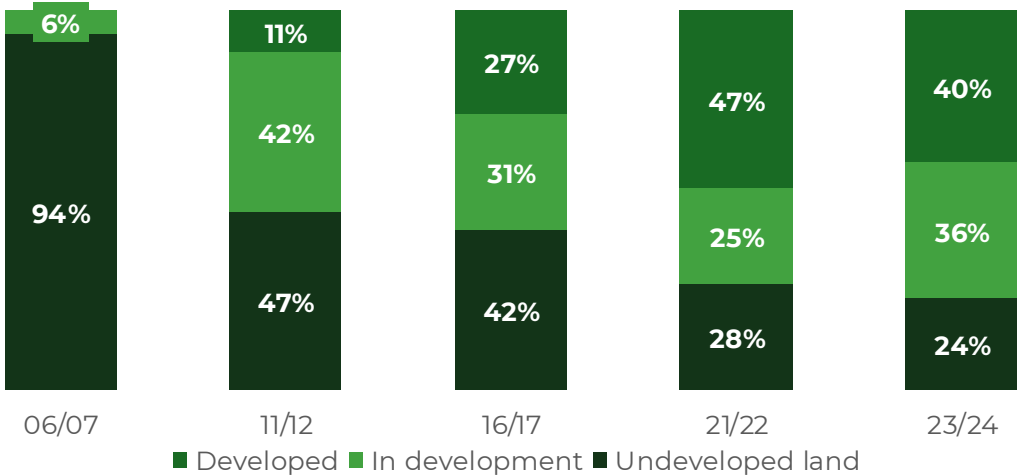

II. Cumulative Investment in Farmland

Investment pace ramped up fueled by structured funding lines (BRL Millions)

III. Evolution of Land Portfolio by Development Stage

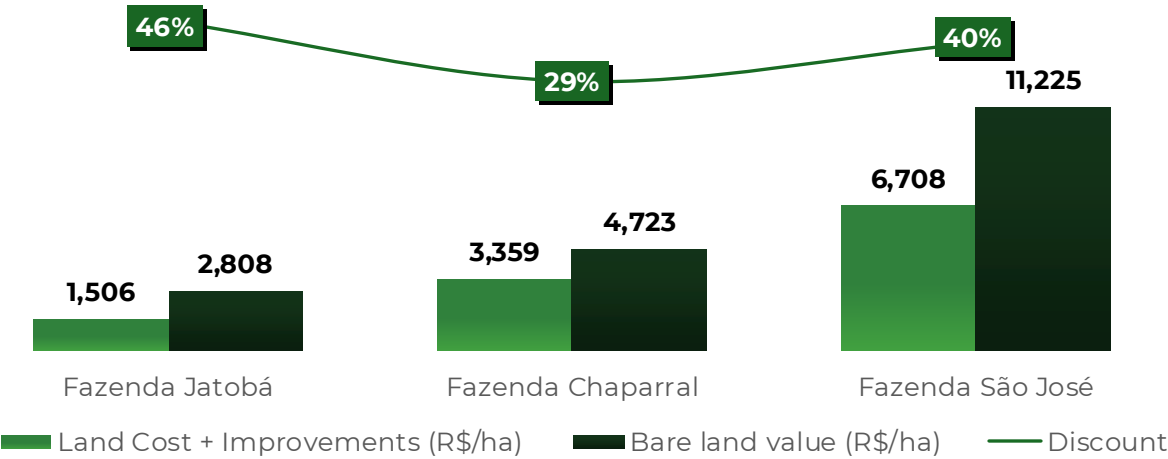

A growing share of developed land reflects successful conversion strategy and operational maturity

Speeding Up Farm Maturation as a Competitive Edge

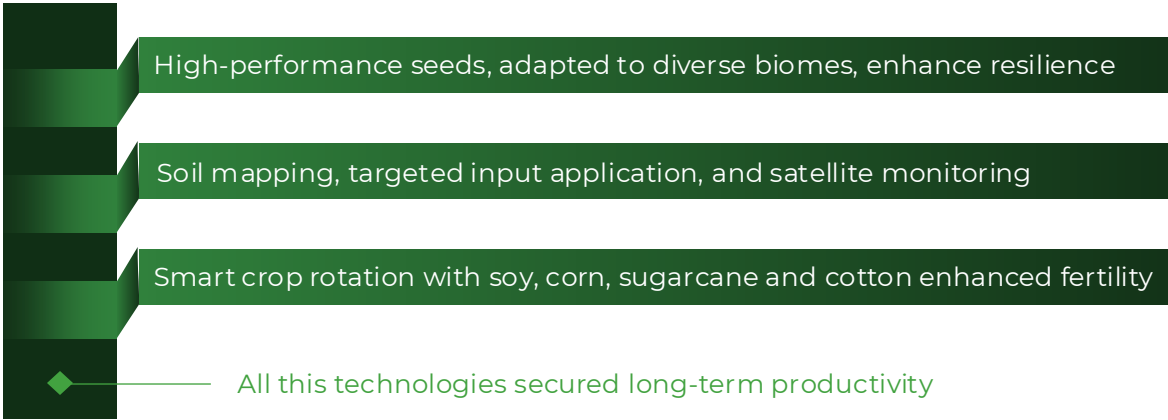

I. Purchasing Farmland Below Market Value

BrasilAgro selects farmland at reduced prices

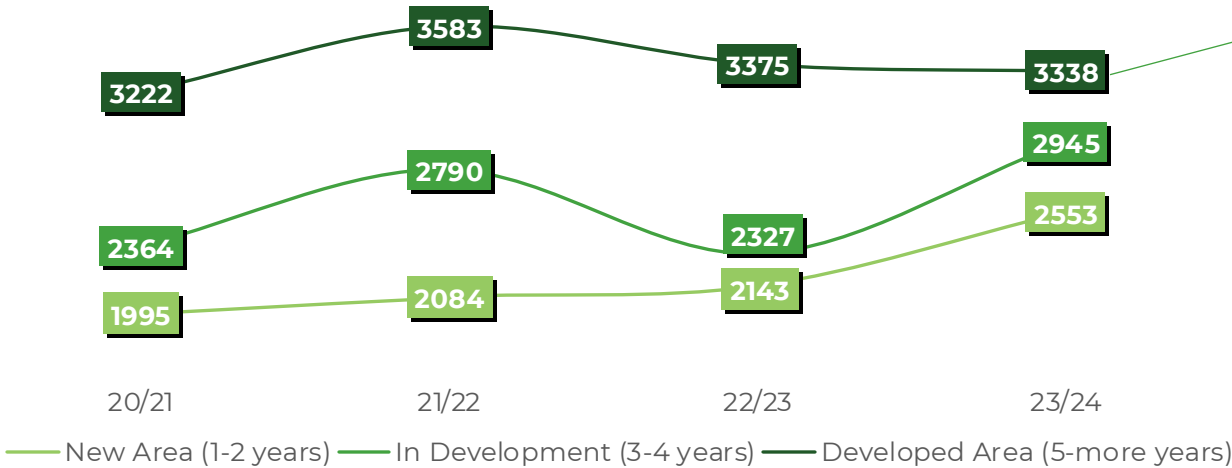

II. Agronomic Innovations Drive Productivity

Agricultural technology unlocks untapped yield potential

III. Soybean Yield Progression by Maturation Stage

New areas quickly reach the productivity of mature farms (t/ha)

IV. BrasilAgro's Competitive Advantage

"The average maturation time, depending on the degree of degradation, will be from 6 to 10 years, while BrasilAgro does it in about 5 years"

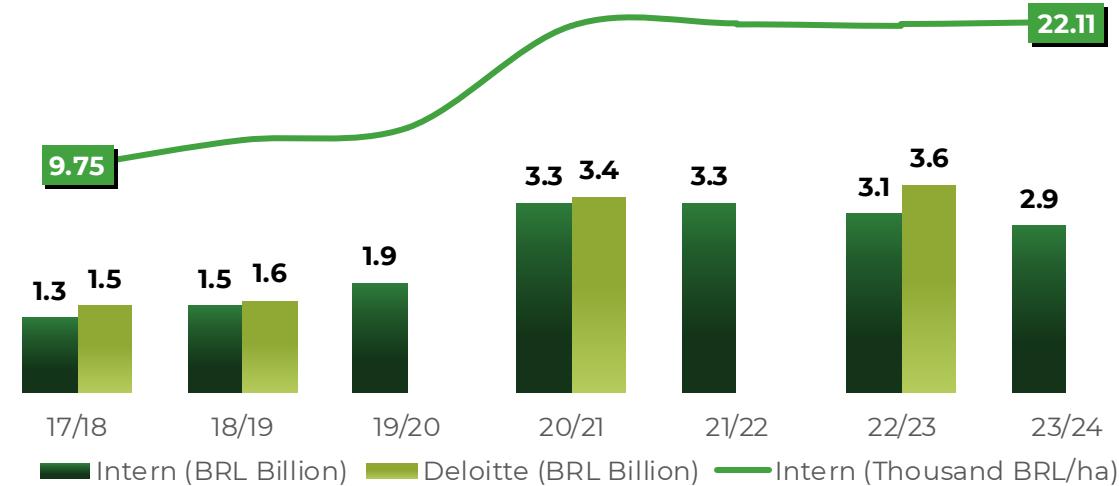

César Brito – Agricultor e dono de usina de cana-de-açúcar

BrasilAgro accelerates the maturation cycle through the intensive use of technology and investments in soil correction and fertility (NPK), as well as modern agricultural management practices

Where Land Becomes Performance

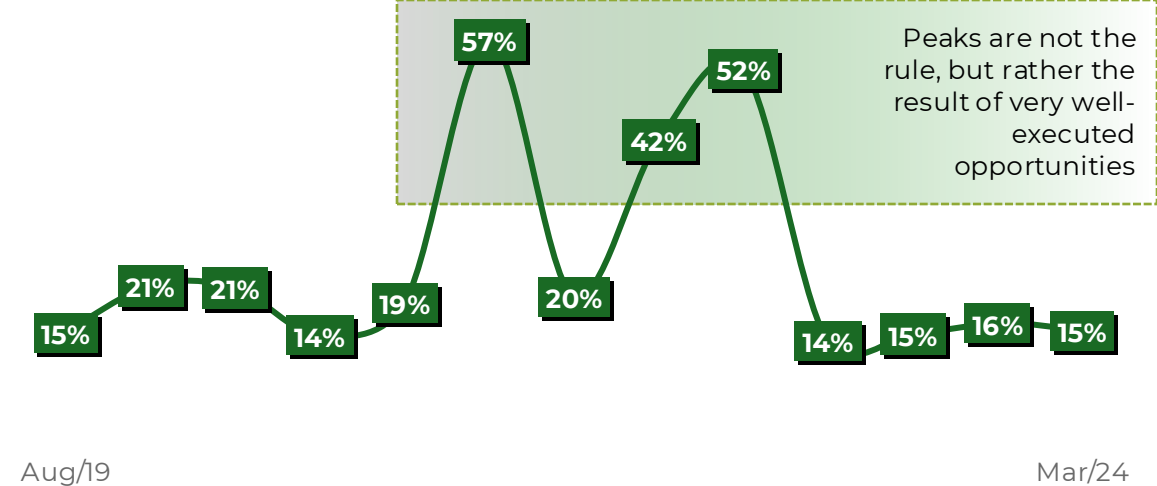

I. Evolution of Farmland Portfolio Valuation and Price per Hectare

The steady appreciation highlights the embedded value in land portfolio, even before monetization

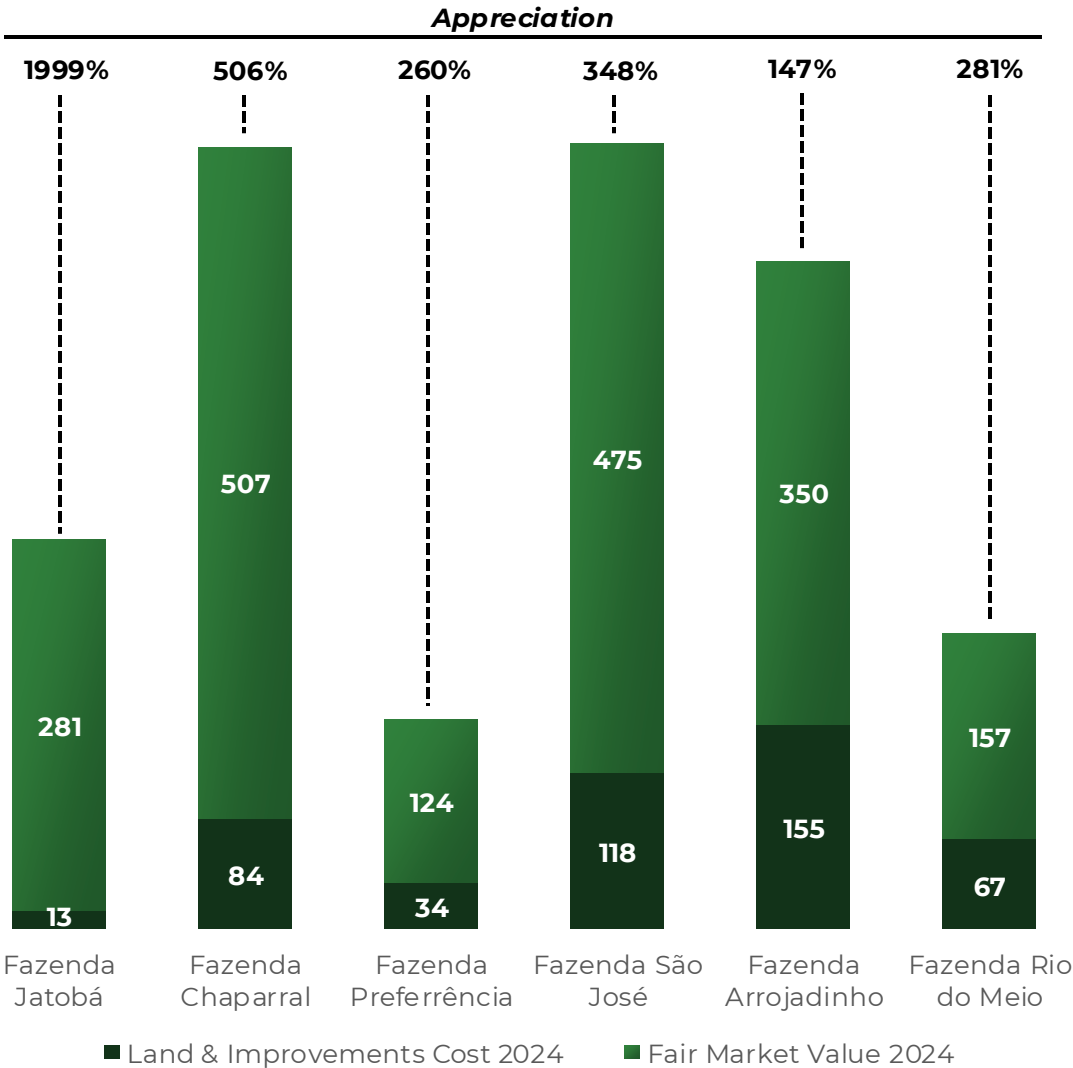

II. Internal Rate of Return (IRR) on Farmland Transactions

Consistent double-digit returns prove the effectiveness of BrasilAgro's buy-develop-sell model

III. Exceptional Land Appreciation Across 13 Owned Properties

BrasilAgro's wholly-owned farmland portfolio appreciated by +187% as of June 2024, proving the value-creation power of our land transformation model (BRL Million)

Unit: The High Returns Of Land Appreciation (Arrojadinho)

I. Cash Flow Generation

Free Cash Flow to the Firm (BRL Million)

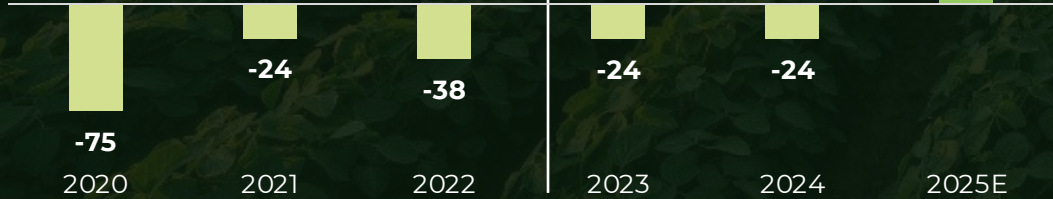

Expansion Phase

Cash flow decline driven by expansion-related expenditures

Cash Generation

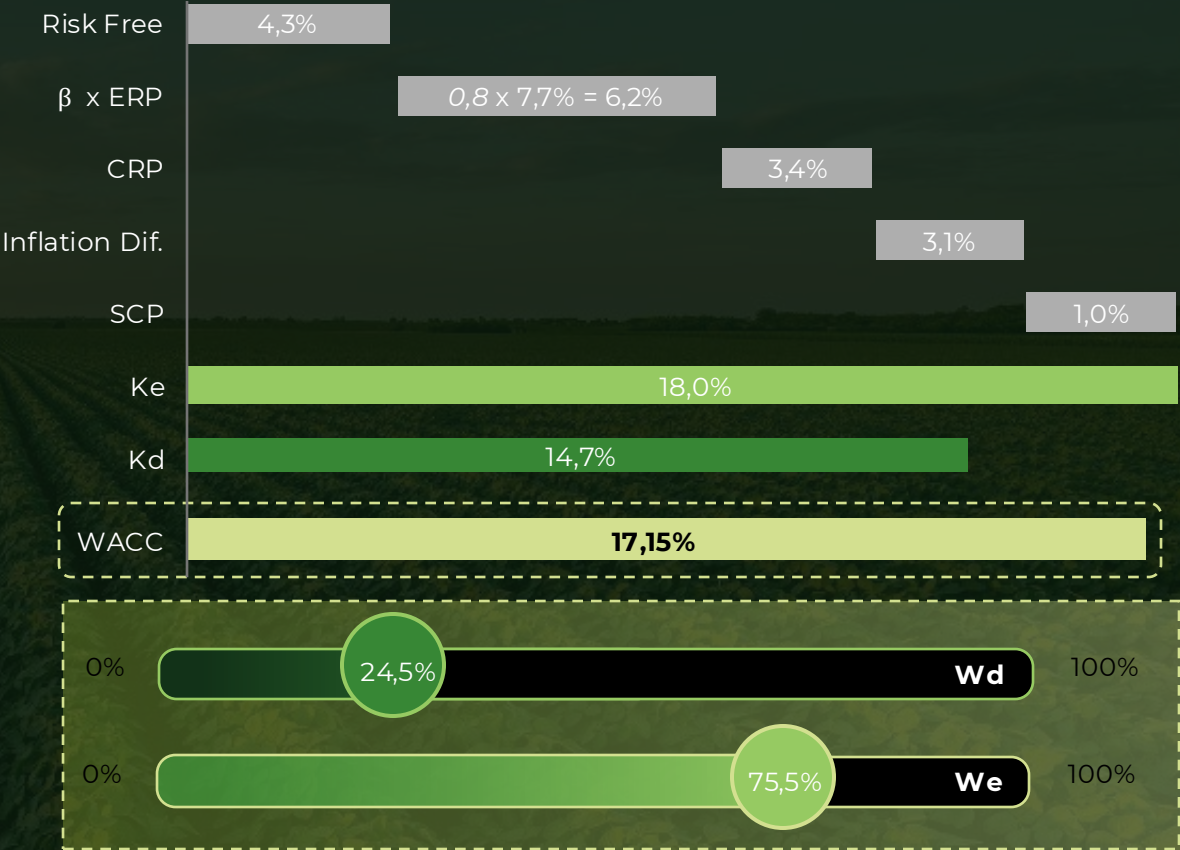

High cash generation due to farm sale (20% value growth in 2025 driven by high productivity)

Low retourns due to low margins and high credt costs

II.DFC Approach to the Unit Valuation

Weighted Average Cost of Capital Decomposition

NPV: 34,9 million

IRR= 23,6%

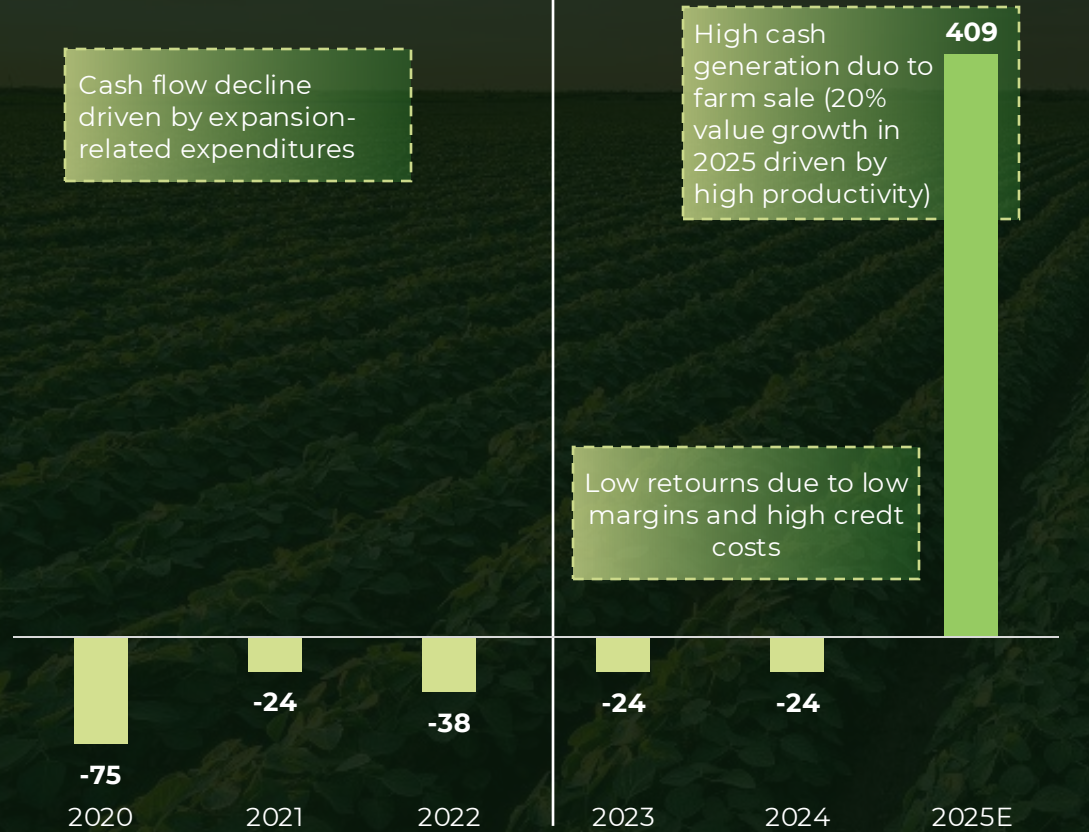

Unit: The High Returns Of Land Appreciation (Arrojadinho)

I. Cash Flow Generation

Free Cash Flow to the Firm (BRL Million)

Expansion Phase

Cash Generation

II. Sensibility to Productivity Variation

The Business Model has Low Sensibility to Productivity Variations

		Soybean Productivity				
		40	45	56	60	65
Corn Productivity	75	16,4%	17,0%	18,3%	18,8%	19,4%
	85	18,7%	19,3%	20,5%	21,0%	21,6%
	98	21,8%	22,3%	23,6%	24,1%	24,6%
	105	23,4%	24,0%	25,2%	25,7%	26,3%
	110	24,7%	25,2%	26,4%	26,9%	27,5%

III. Sensibility to Debt and Loan Rate

More Debt in the Capital Structure Results in Higher IRR due to Ke/Kd Spread

		Loan Rate				
		7%	9%	12%	15%	17%
Wd	15%	23,0%	22,8%	22,5%	22,2%	22,0%
	25%	24,9%	24,6%	24,1%	23,6%	23,2%
	40%	28,8%	28,2%	27,3%	26,3%	25,6%
	55%	34,1%	33,1%	31,5%	29,8%	28,7%
	70%	42,6%	40,7%	37,9%	35,1%	33,2%

Unit: The High Returns Of Land Appreciation (Arrojadinho)

I. Cash Flow Generation

Free Cash Flow to the Firm (BRL Million)

Expansion Phase

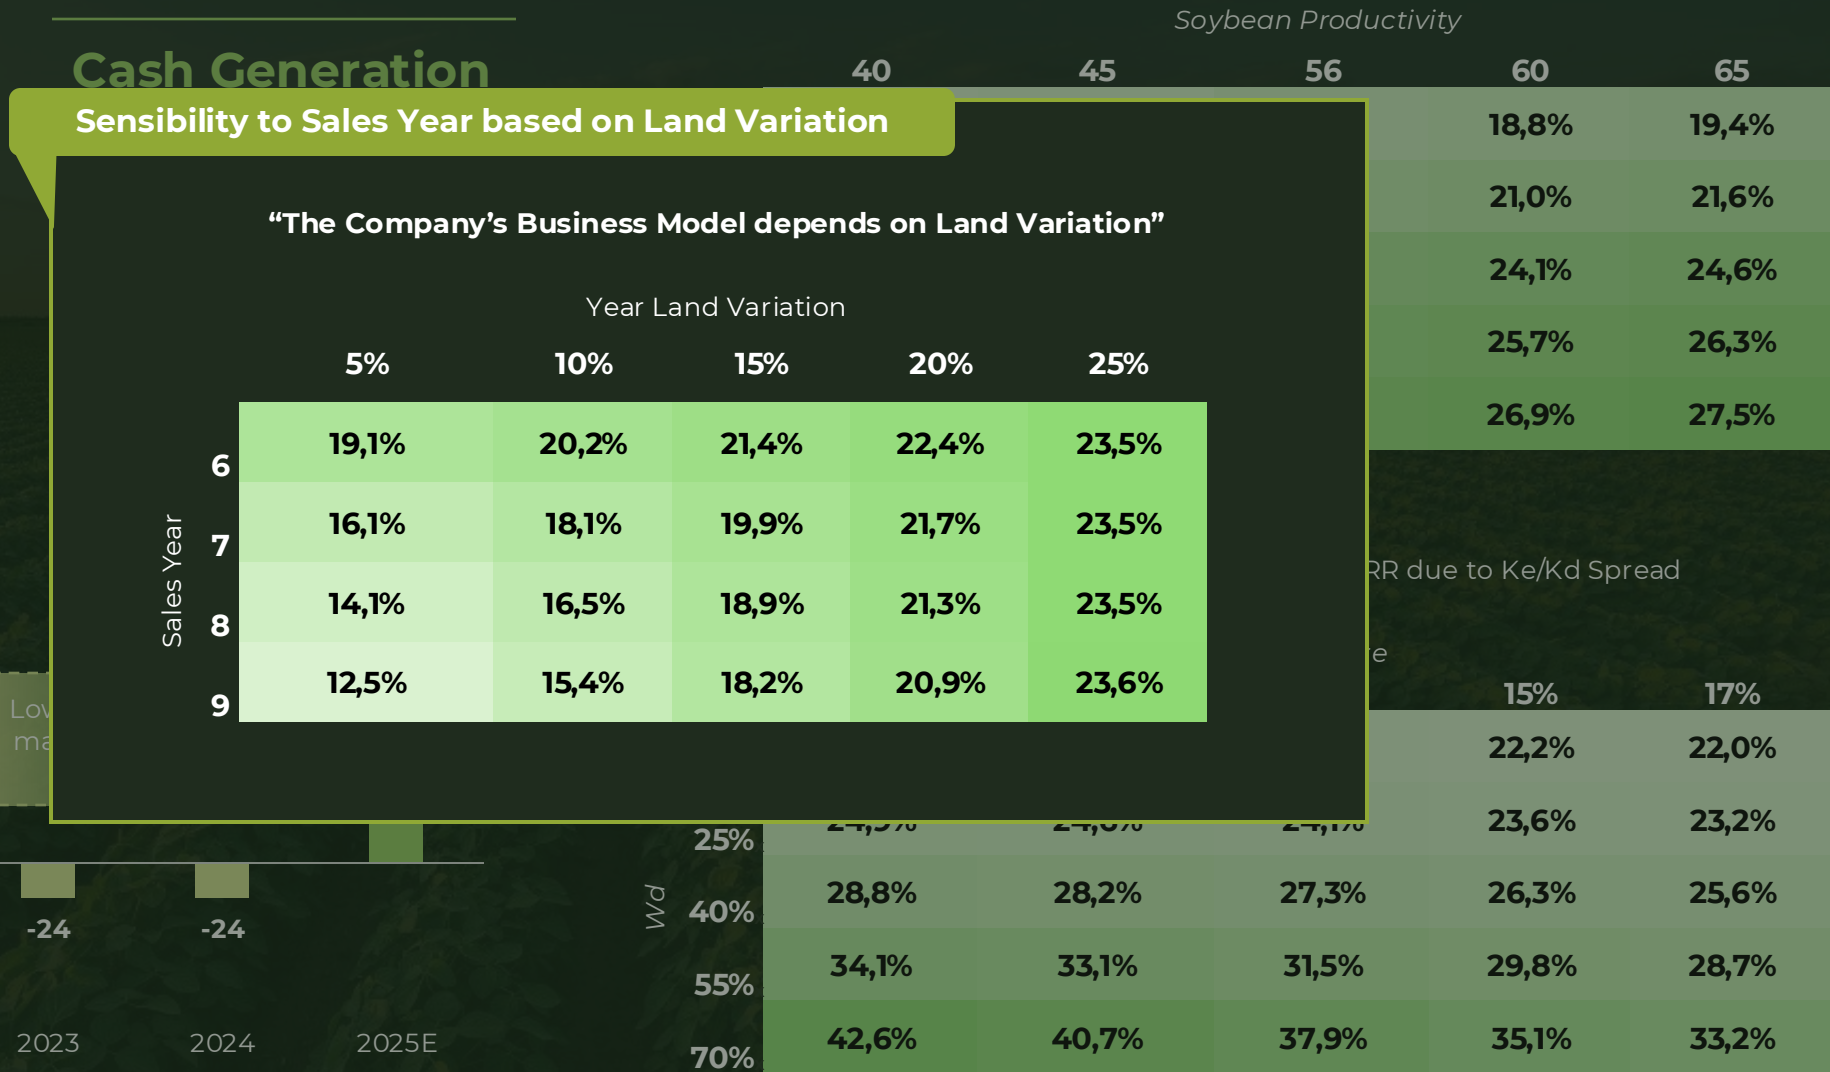

Cash flow decline driven by expansion-related expenditures

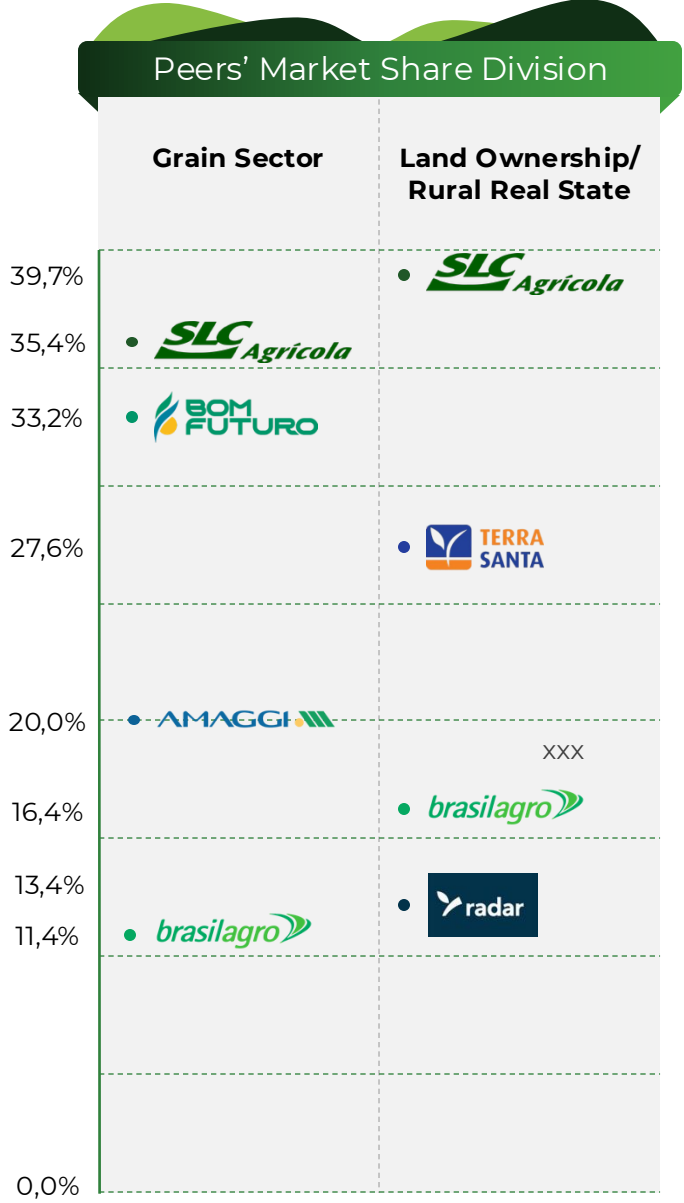

Sources: BrasilAgro IR

II. Sensibility to Productivity Variation

The Business Model has Low Sensibility to Productivity Variations

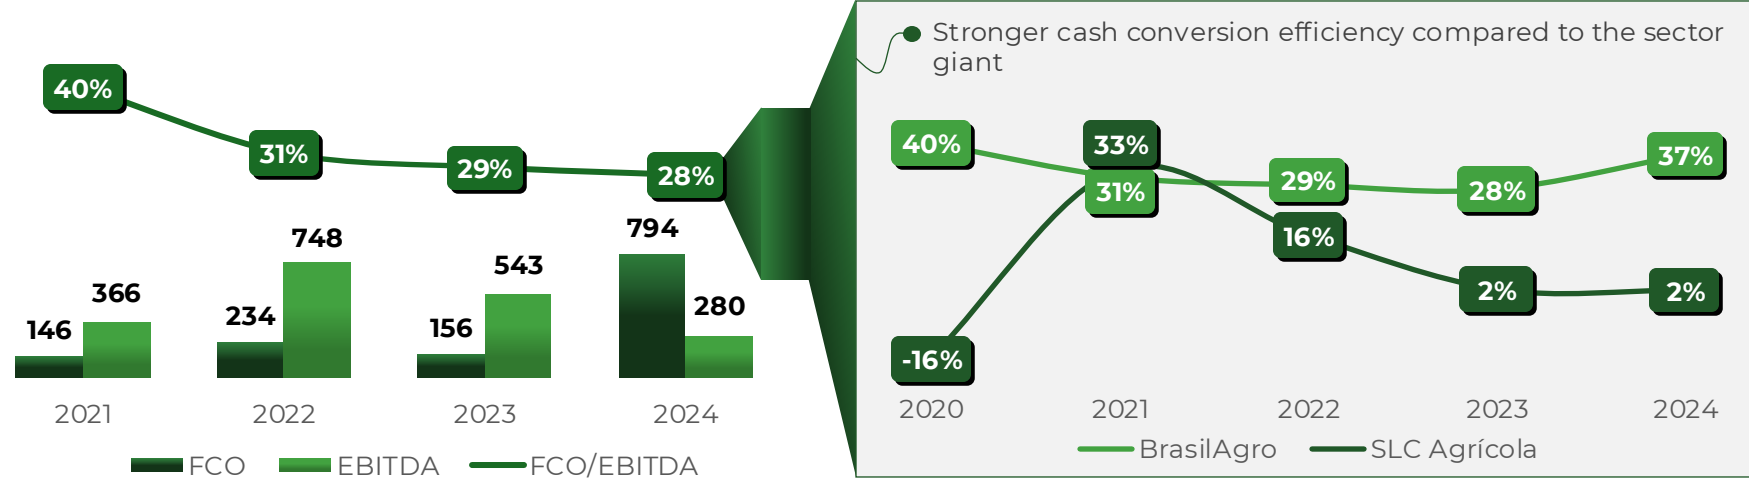

Cash Flow Metrics Compared to Industry Peers

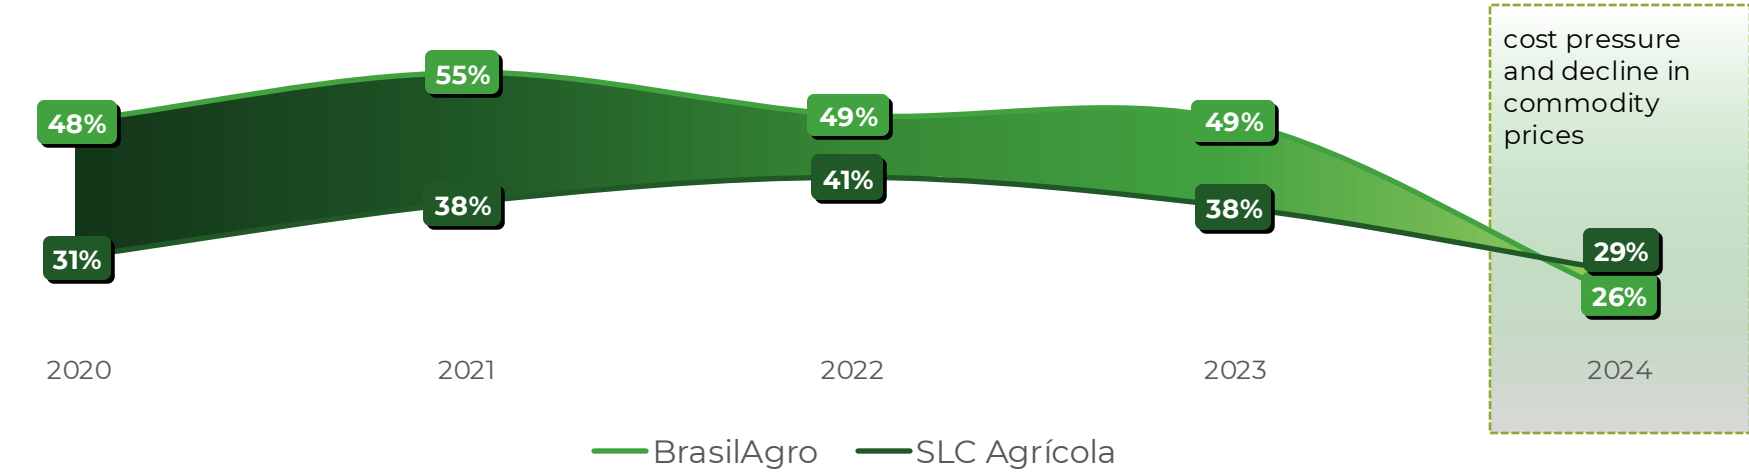

I. Cash Conversion: OCF/EBITDA Evolution

The decline was driven by lower land sales, weaker operational EBITDA, and higher working capital needs (BRL Million)

II. EBITDA Margin Gap Narrows

After maintaining consistently higher margins, BrasilAgro sees convergence with SLC due to adverse market dynamic

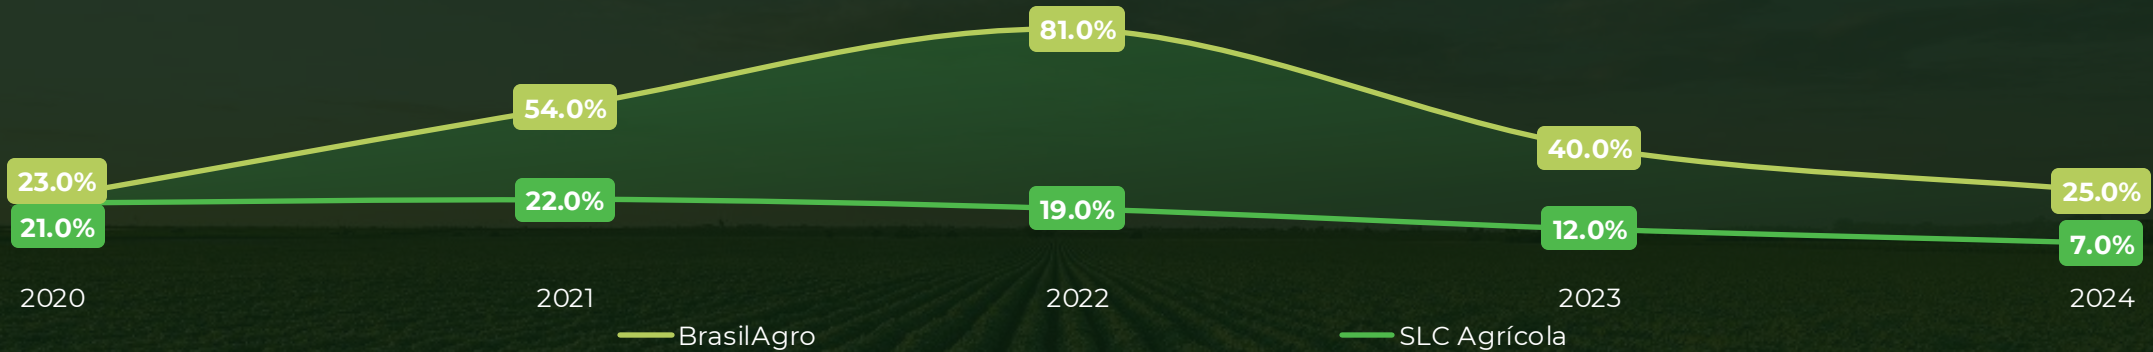

Profitability and Dividend Distribution Benchmark vs SLC Agrícola

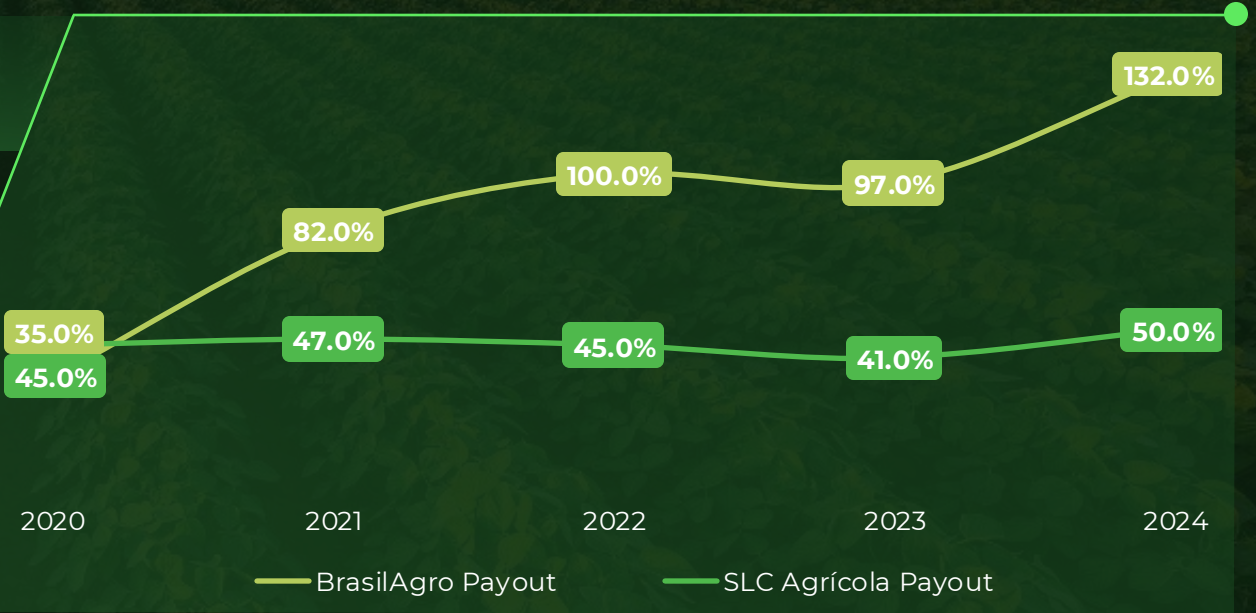

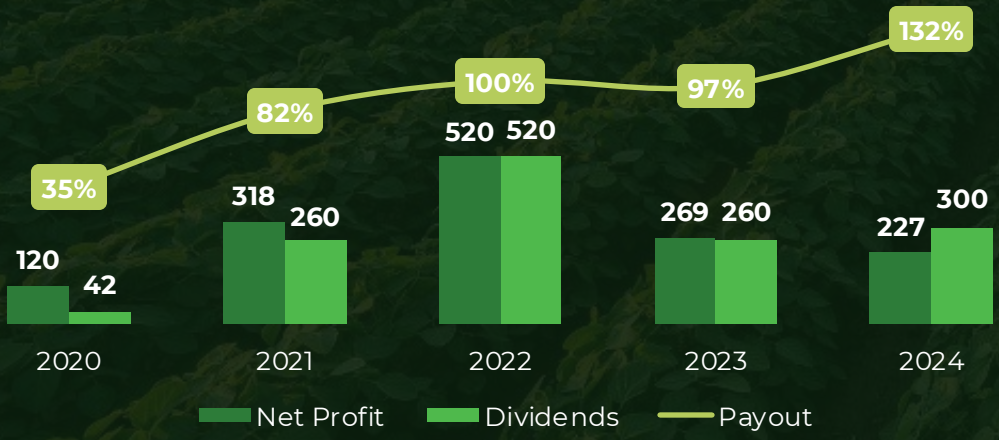

Return on Equity Evolution

BrasilAgro stands out for maintaining a structurally higher level of profitability, reinforcing the company's leadership in return on equity

Commitment to Shareholder Value

Consistent and growing cash returns to shareholders (BRL Million)

I. Book Value and NAV Comparison

Land portfolio revaluation highlights hidden value beyond accounting metrics (BRL Million)

	BOOK	NAV
Net Asset Value	2.179.679	3.546.762
Quantity of Stocks	102.683	102.683
	21,23	34,54
Book value understates the company's real asset base, with farmland revaluation showing a higher intrinsic worth		

III. Land Always Holds Value

A tangible asset that consistently appreciates over time

Asset Security

Land is a **tangible and permanent asset** that cannot lose all its value like financial instruments. It **preserves wealth** through crises, inflation, and currency devaluation, making it a **reliable long-term store of value**

Scarcity and Demand

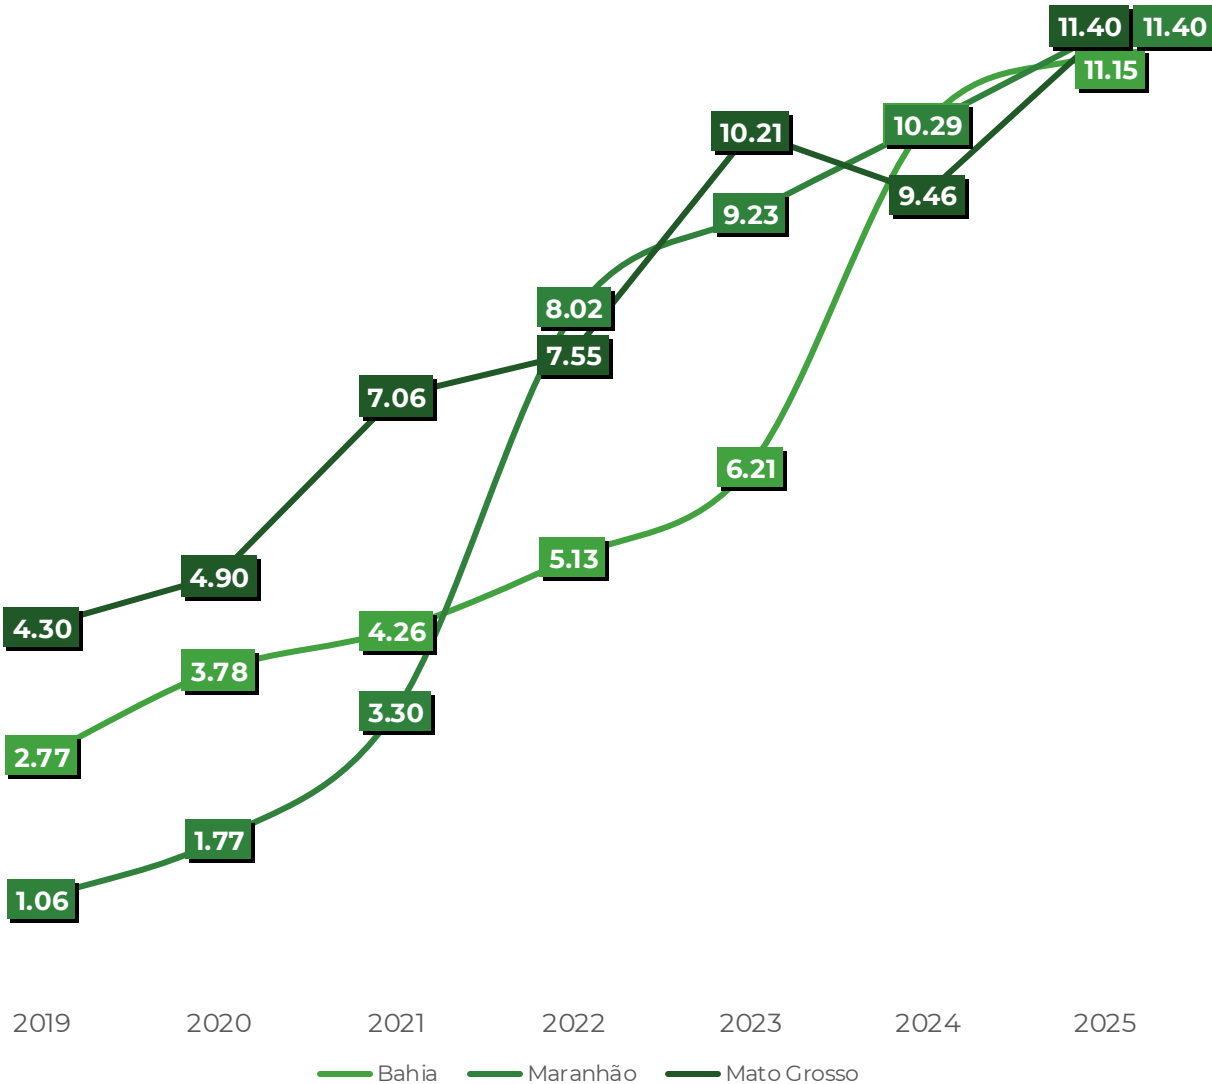

Fertile land is limited, and demand for food, biofuels, and clean energy continues to **grow with the global population**. This scarcity ensures **long-term value appreciation**, especially in regions like Brazil

Historical Appreciation

Farmland has shown **consistent appreciation** over decades, supported by expanding agricultural frontiers and global demand for food. Even in economic downturns, it remains **resilient compared to other assets**

II. Bare land value (thousand R\$/ha)

Bare land values rising and aligning across states

Investment Theses

Winning Business Model

Resilient model combining crop diversification, productivity growth, and land appreciation

A Resilient Growth Model for BrasilAgro

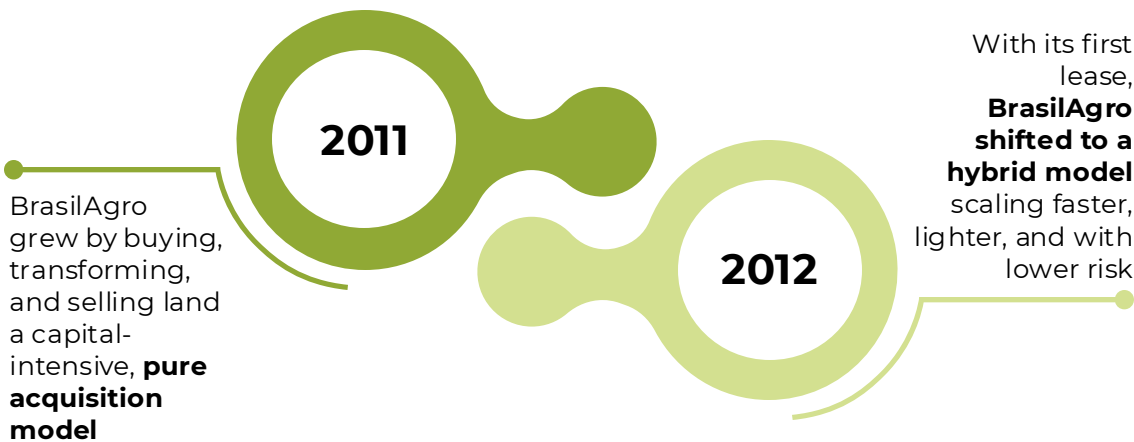

Balancing land cycles, climate exposure, and low-capex strategies to drive sustainable returns and capital efficiency

Strategic Growth Avenues

Market consolidation, pasture conversion and LatAm expansion

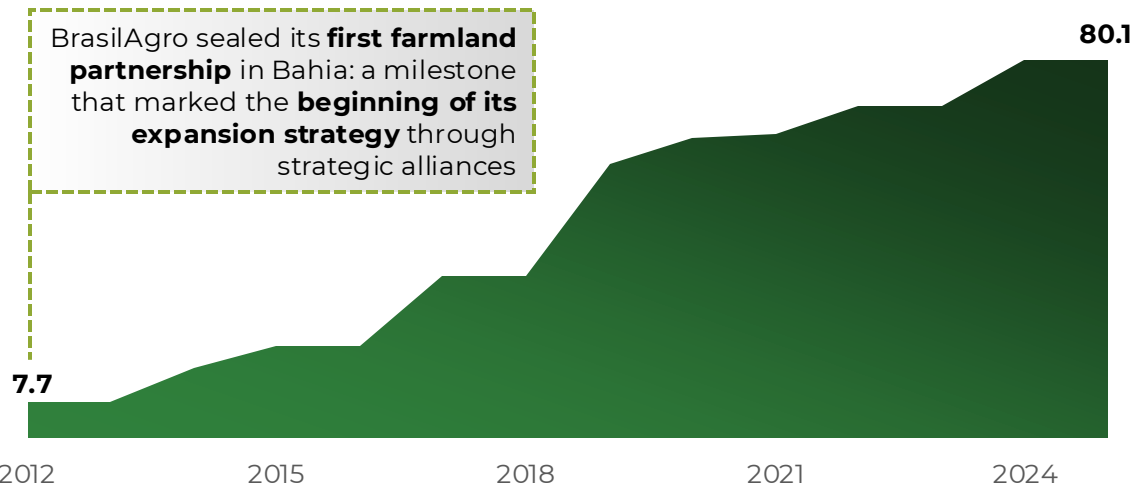

I. BrazilAgro's Strategic Shift

From a pure acquisition model to a hybrid path of acquisitions and leases, enabling faster growth and reduced risk

III. Accumulated Farmland Under Partnerships

Partnerships as a catalyst for sustainable growth and risk-sharing (Thousand/ha)

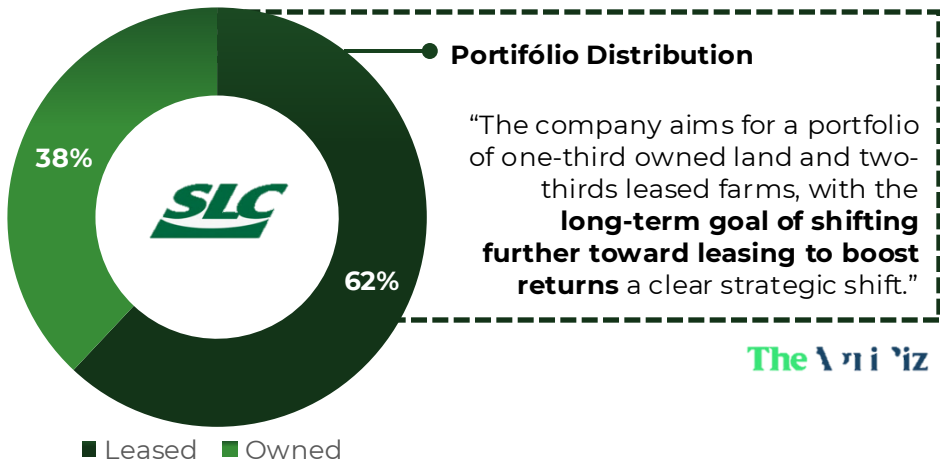

II. BrazilAgro's Return on Invested Capital

Shifting from pure land acquisitions to a balanced model with leasing, reducing capital needs and stabilizing returns

IV. Leasing as a Strategic Growth Driver

SLC shifts toward a portfolio where leased land dominates, aiming for higher returns and long-term capital efficiency

Climate Diversification Mitigates Risks

Strategic Footprint Across Brazil's Agricultural Frontier

BrasilAgro operates in high-potential regions, combining scale, crop diversity, and land appreciation opportunities

Sources: BrasilAgro IR

Strategic Diversification to Unlock Resilient Revenue Streams

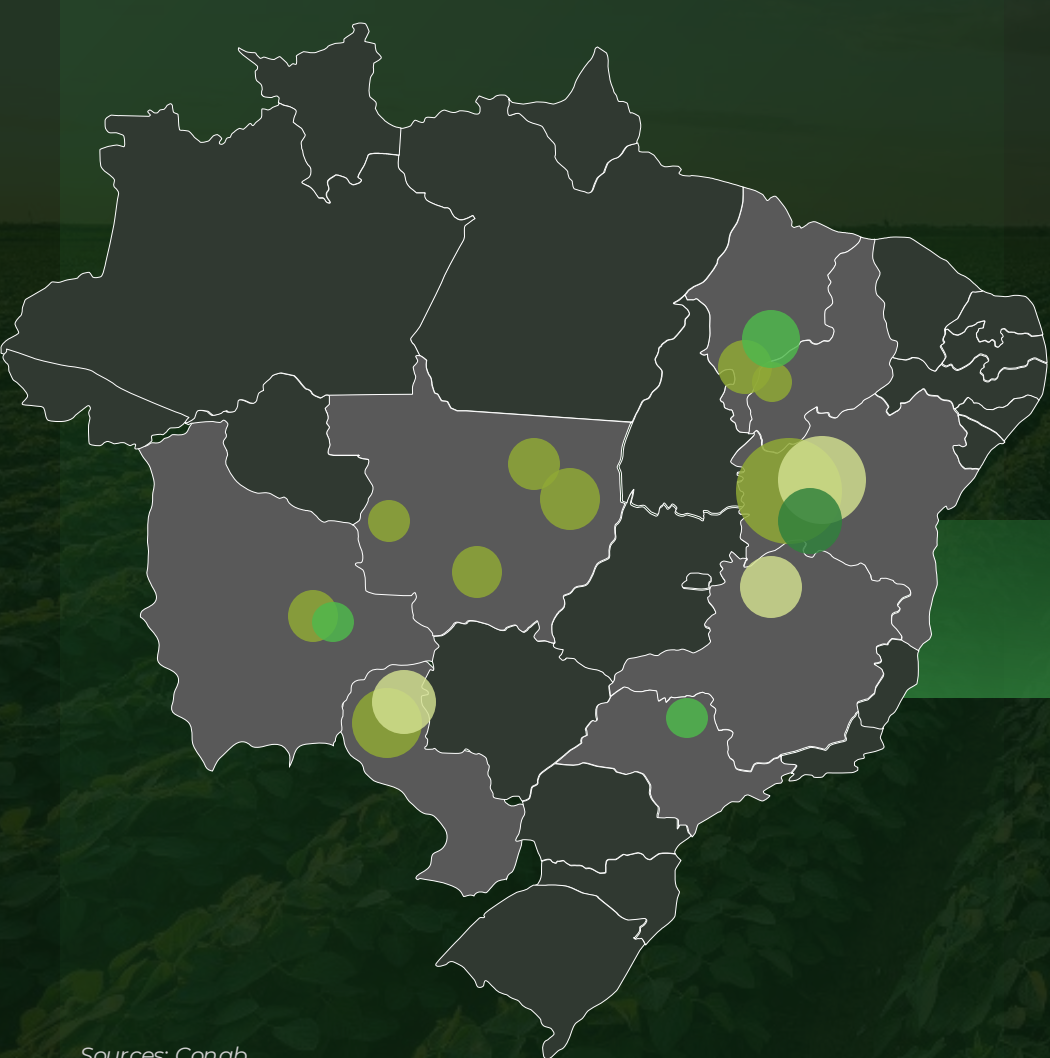

Risk Mitigation through revenue mix diversification; Balancing crops and livestock to mitigate risks and stabilize earnings

Climate Diversification Mitigates Risks

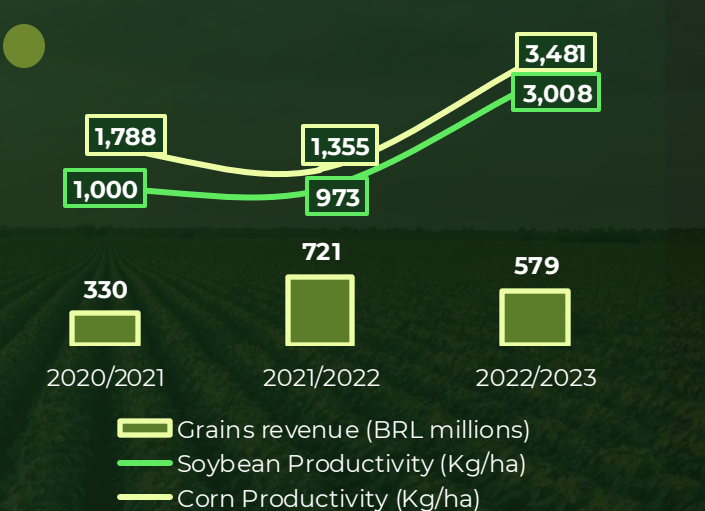

Strategic Footprint Across Brazil's Agricultural Frontier

BrasilAgro operates in high-potential regions, combining scale, crop diversity, and land appreciation opportunities

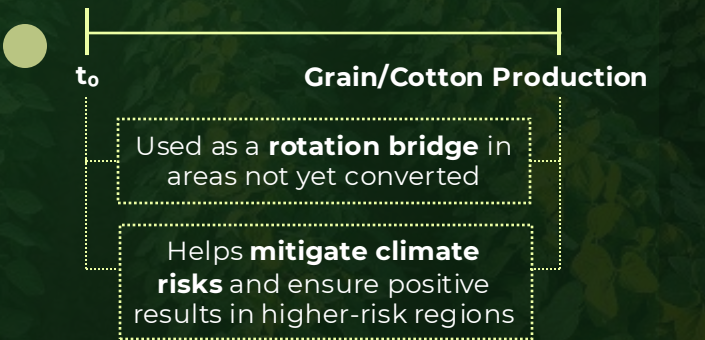

Grains Revenue (BRL Million) vs Paraguay Productivity (kg/ha)

Resilient grain portfolio: weather shocks offset by diversification

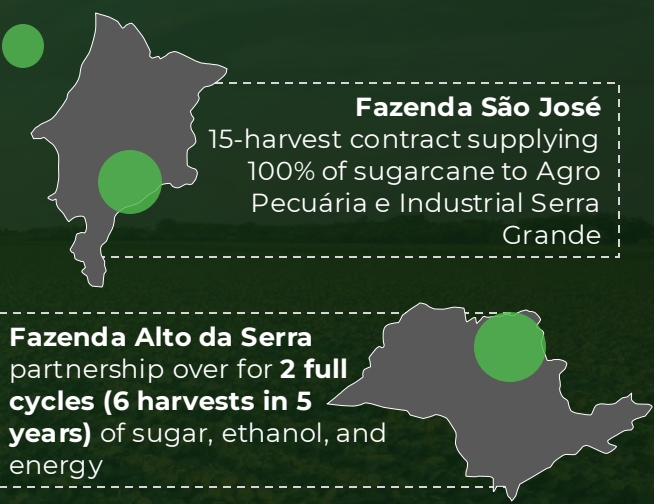

Pastures as a Strategic Transition Asset

Transitional model that mitigates risks and maximizes land potential

Strategic Long-Term Partnerships (Sugarcane)

Long-term contracts ensuring steady cash flow and expansion into bioenergy

Cotton: Dual Value Creation

Rotation gains, dual monetization, and international competitiveness

Solid Operation Backed by Hedge Strategy

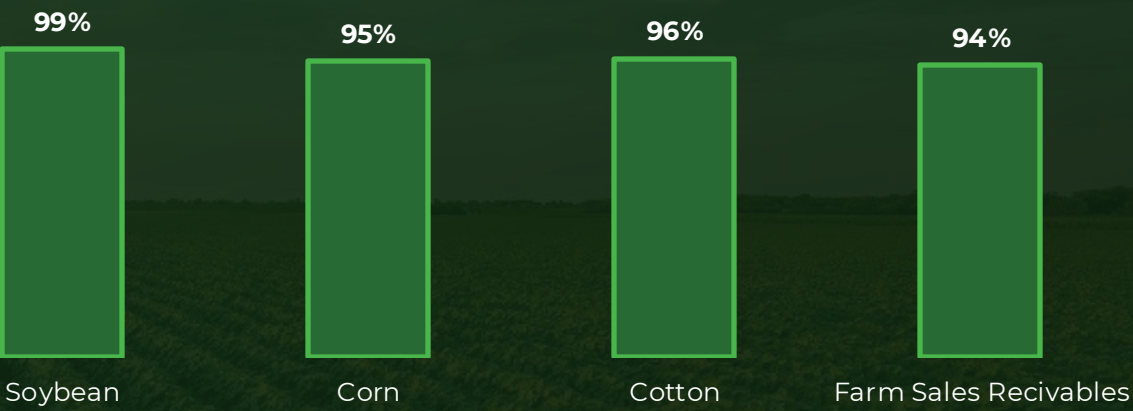

Stable Margins

Diversification and hedge make the revenue predictable

Crop Hedge

Hedge the whole crop, protecting from price variation

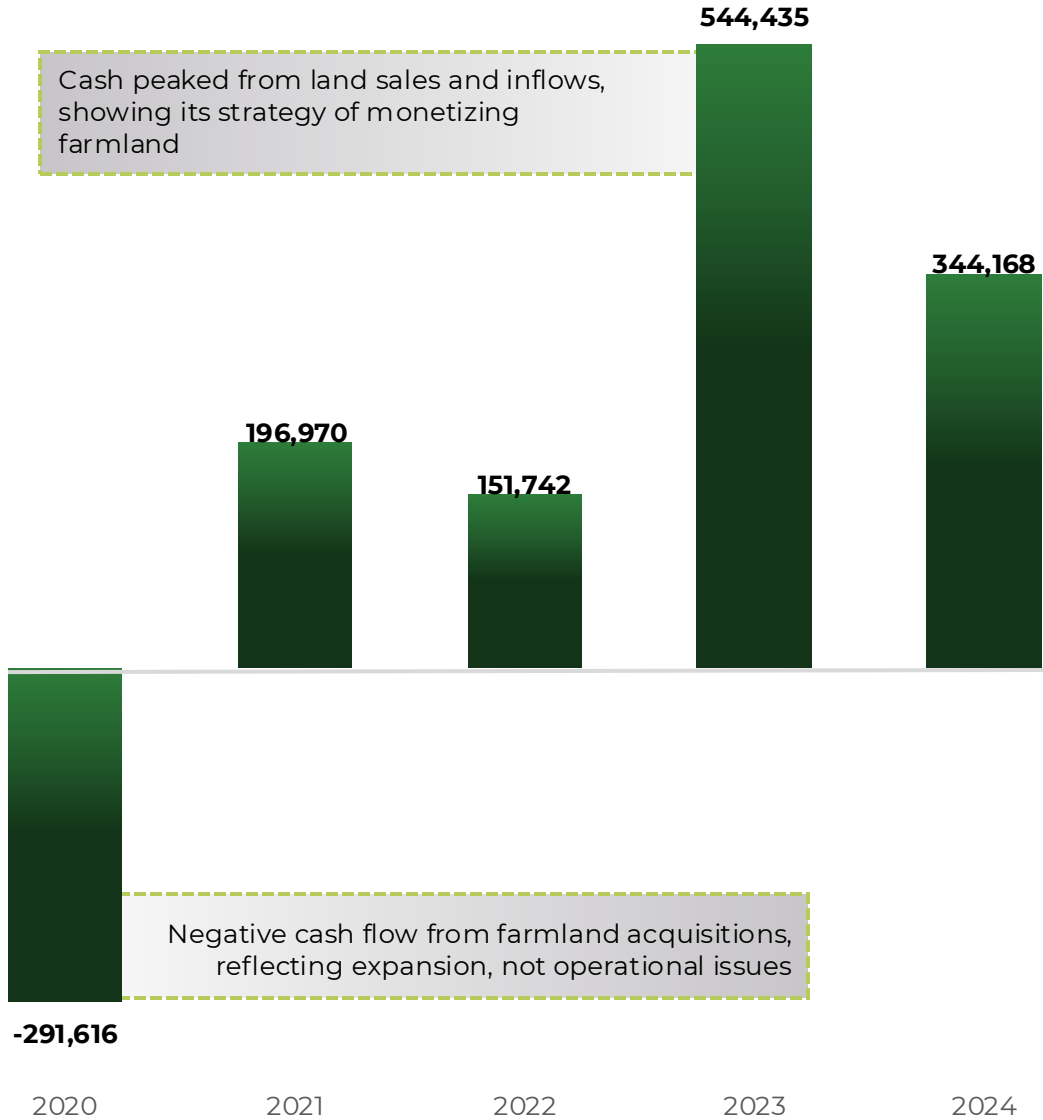

Currency Hedge

Hedge all currency variation, protecting from exchange rate variation

I. Cash Flow Evolution

Leases, sales, and cash reserves balance stability and liquidity opportunities

Cash peaked from land sales and inflows, showing its strategy of monetizing farmland

Negative cash flow from farmland acquisitions, reflecting expansion, not operational issues

II. Strategic Land Management

Leases and acquisitions balance cash flow, diversify crops, and reduce exposure to market cycles

Contract 1 – Lease (Mar/2024)

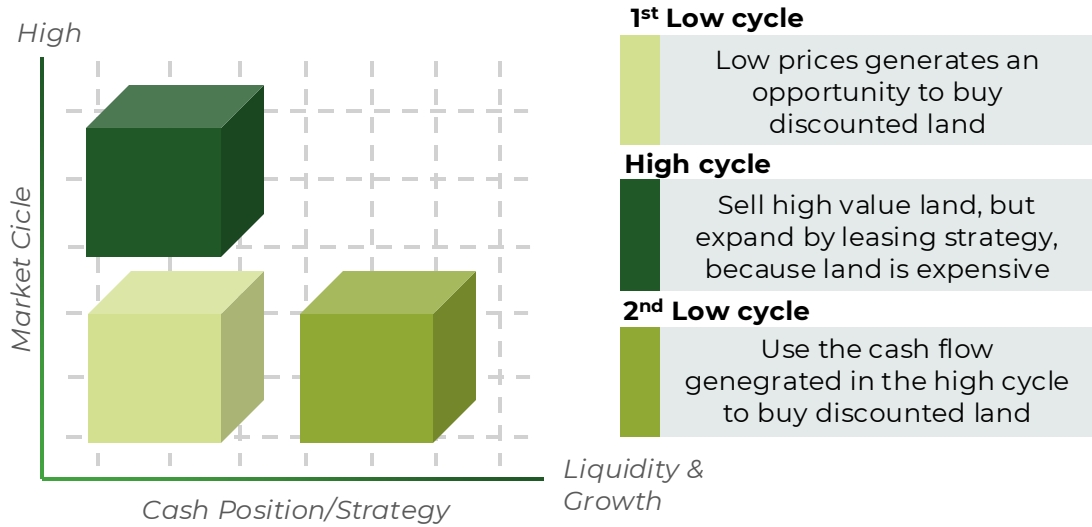

Type: Land Lease
Location: Brotas, São Paulo
Area: ~7,000 ha
Purpose: Sugarcane production (sugar + ethanol)
Term: Until 2029 (5,060 ha in 2024, remainder by 2029)
Value: Not disclosed

Contract 2 – Acquisition (Aug/2024)

Type: Company Acquisition (Companhia Agrícola Novo Horizonte S.A.)
Location: Primavera do Leste, Mato Grosso
Area: 4,767 ha (leased)
Purpose: Agricultural production (soy-based lease)
Term: 16 years (average rent: 13 soybean bags/ha)
Value: R\$36.4 million

III. Risk Mitigation Across Market Cycles

Leases, sales, and cash reserves balance stability and liquidity opportunities

I. Cash Flow Evolution

Leases, sales, and cash reserves balance stability and liquidity opportunities

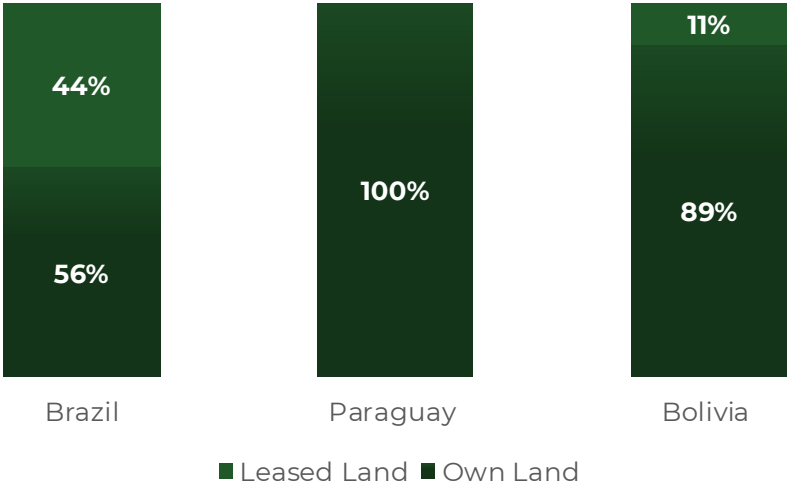

II. Strategic Land Management

Leases and acquisitions balance cash flow, diversify crops, and reduce exposure to market cycles

Portfolio Balance and Expansion Beyond Borders

I. Portfolio Balance Across Regions

Different land ownership structures in Brazil, Paraguay, and Bolivia reflect diverse strategies for scale, risk management, and growth potential

II. Expanding Beyond Borders

Balancing Bolivia and Paraguay while building a “mini BrasilAgro” in the eastern region

“We do not plan to lease land in the Chaco or western Paraguay. Instead, our focus is on the eastern region, where we aim to build what would be a mini BrasilAgro”

“This is a clear objective and a goal for the company this year: better balance the portfolio in Bolivia and Paraguay, so that these operations can stand on “their own””

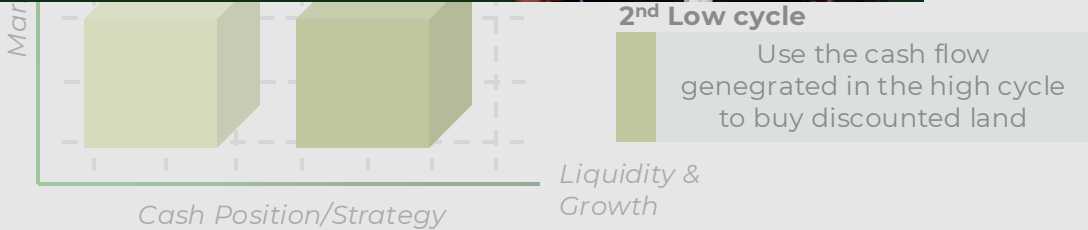

CEO
André
Guillaumon

Negative cash flow from farmland acquisitions, reflecting expansion, not operational issues

I. Regional Context

Market conditions and land dynamics by industry expert

Current Prices - "Today, in the MATOPIBA region, it is no longer possible to find the historically discounted land prices. However, **the focus remains on pasture conversion**, as all regions are expected to undergo a process of appreciation."

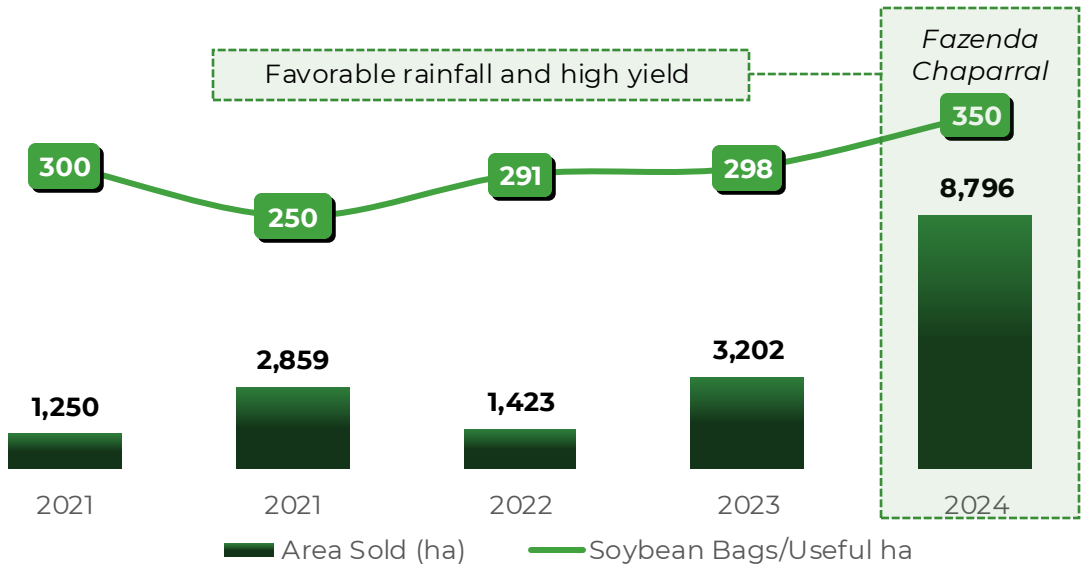

Unheated market – "Rural producers are not buying due to the **increase in credit costs**, which has led to a **record number of judicial recoveries** in the sector. As a result, **demand for land has dropped significantly**, while **supply has increased**."

Pedro Travain, Rural Real Estate Broker

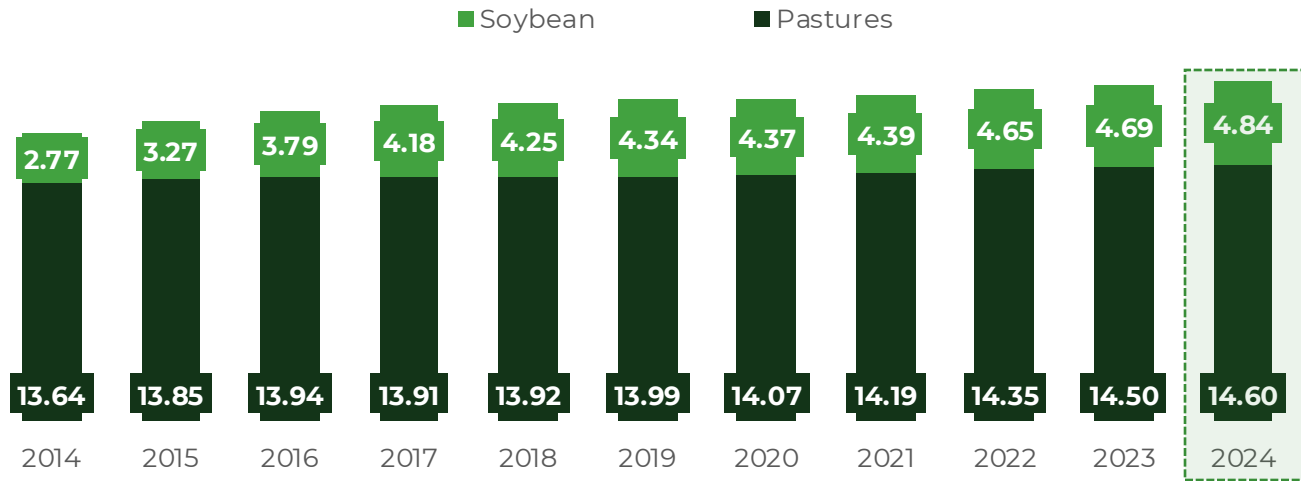

II. Recent BrasilAgro Land Sales in Bahia

Increasing soybean sacks per hectare over time

III. Pasture Area vs. Soybean Area (in million hectares)

Soybean area grew at a 5.7% CAGR from 2014 to 2024

Recent MATOPIBA Land Transactions – 2025

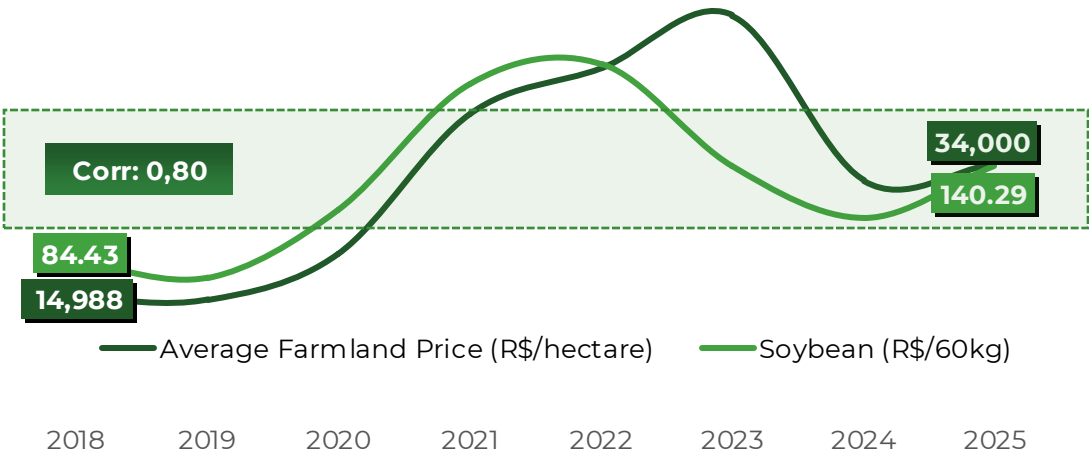

"Areas with good rainfall: Productive lands, on the Tocantins border. Cash: ~500 sacks/ha. Financed: 700–1,000 sacks/ha.
Areas for irrigation: Require investment in energy and irrigation. Initial price (5–6 year term): ~250 sacks/ha."

Tobias Schmidt – MATOPIBA Producer

I. Correlation Between Soybean Prices and Farmland Valuation

Farmland prices reflect soybean trends, not inflated

II. Land Prices and Expansion Strategy in MATOPIBA

Prices remain low, and expansion will be carried out opportunistically

"Today in MATOPIBA you can't find land at the past price levels. There is a strong correlation between farmland prices and soybean prices."

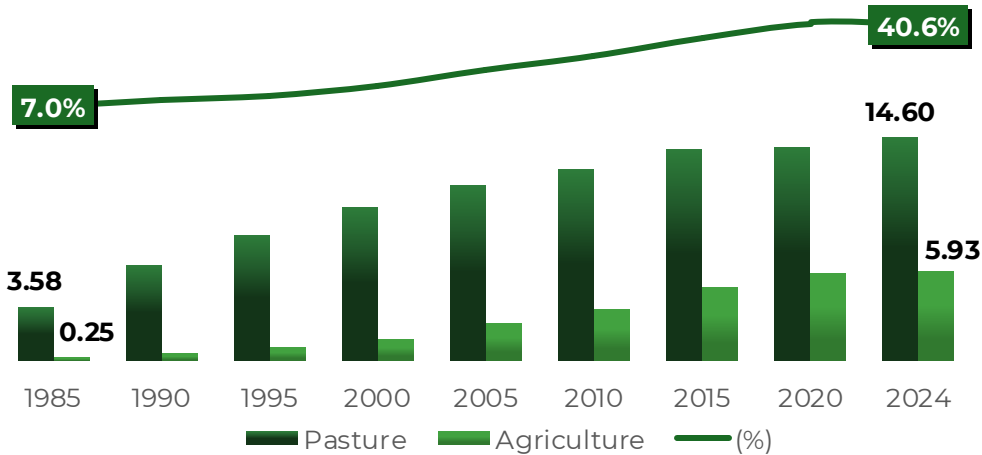

Pedro Travain, Rural Real Estate Broker

"Our strategy is to evaluate opportunities in a selective and disciplined manner, prioritizing assets with appreciation potential. In this sense, expansion in the region is mapped, but **will be carried out opportunistically.**"

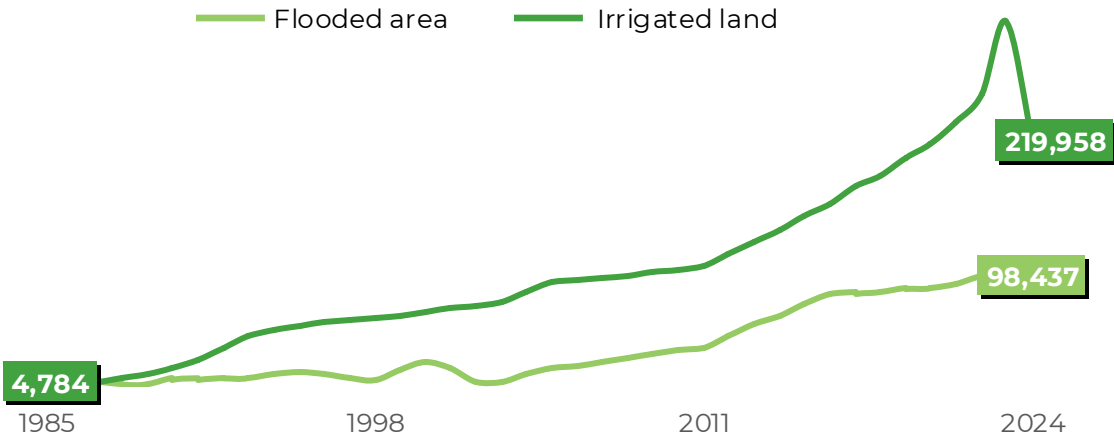

III. Pasture x Agriculture (in million hectares)

Strategic Opportunity in Pasture Conversion in MATOPIBA

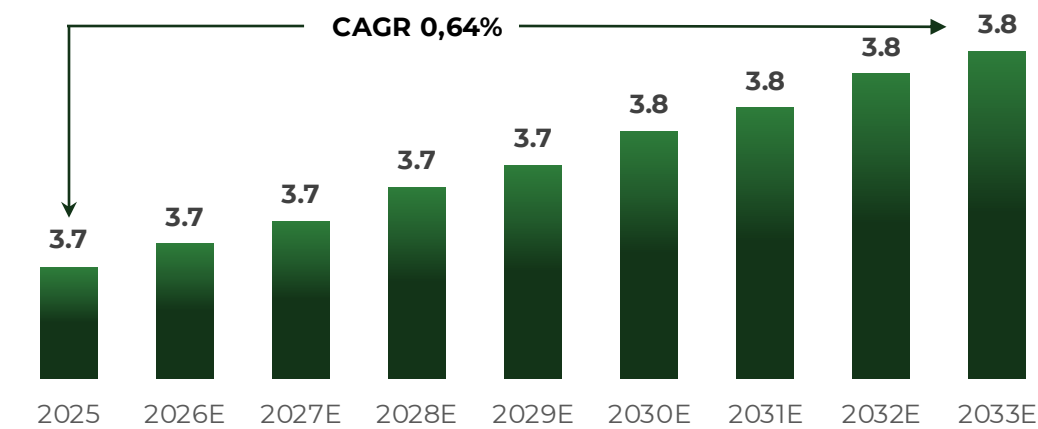

IV. Flooded area X Irrigated land(in hectares)

There are water resources available, and in areas without sufficient supply, irrigation systems have been implemented

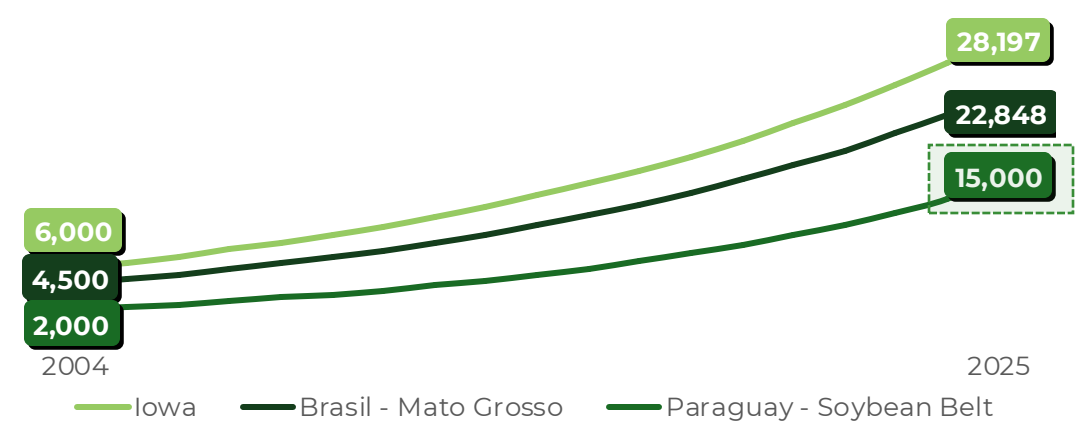

I. Projected Soybean Cultivated Area(in Millions ha)

The projection of the cultivated area shows potential in the country

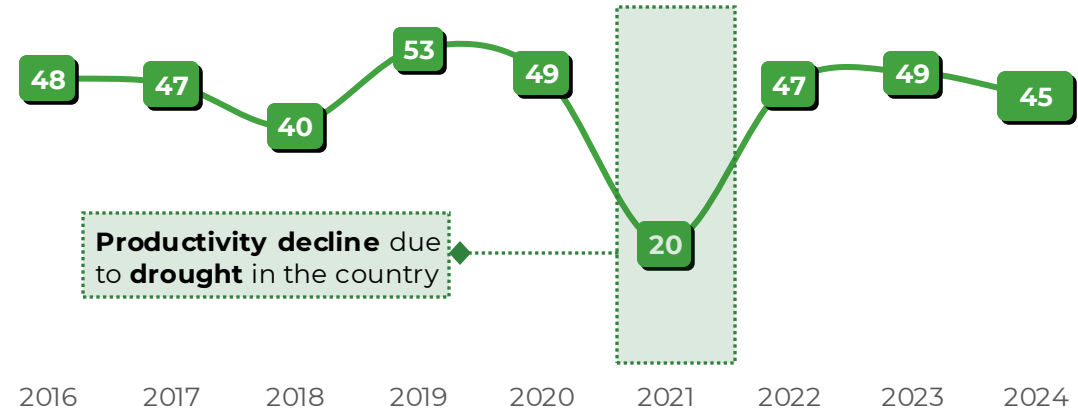

II. Net value of productive land (USD/ha)

Competitive Advantage of Paraguay's land value

II. Average soybean productivity (Bags/ha)

Stable productivity but potential to increase the numbers

III. Chalenges and advantages

Annalizing the problems and the benefit of expanding to Paraguay in the eyes os someone

-  Paraguay has **challenging logistics**, farms located about 200 km from paved roads, and during rainy season **progress gets slower**, making transportation **difficult**
-  It's a country with **lower prices and taxation**, **flexible environmental rules**, ensuring **higher returns**
-  **Unlike Brazil's** complex political and economic scenario, **Paraguay is more stable**, a **dollarized country** with no currency risks

Pedro Travain, Rural Real Estate Broker

I. Projected Soybean Cultivated Area(in millions/ha)

The projection shows the possibility of growth in the country

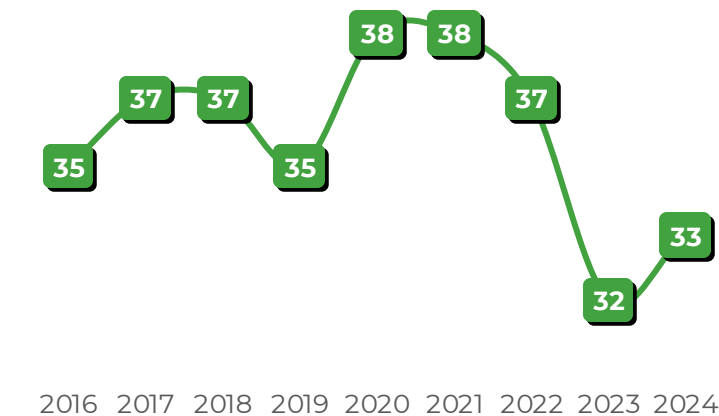

III. Net value of productive land (USD/ha)

Competitive Advantage of Bolivia's land value, showing potential in the expansion for the company

II. Average soybean productivity (bags/ha)

Local producers' practices and their effects in the country's production

Due to poor practices of local producers, as:

Silty soil that is **difficult to manage** (easily compacted)

Lack of soil analysis and correction(extremely fertile soil has led to the perception that no correction is necessary)

Intensive **monoculture** (several producers growing only soybeans for years)

IV. Privileged geographic position

Strategic infrastructure and logistics, with facilitated access to markets and generating a competitive advantage for the country

The **government** is **building** the **country's largest slaughterhouse** in the **San Borja** region

La Paz (300–1,000 km): **Largest** domestic **grain consumer** market

The **Treaty of Petrópolis** allows **Bolivia to use Brazilian territory**, in **Porto Velho**, for **exports**

The **road** from **Riberalta** to **Rurrenabaque** was **fully paved** in **2024**, **making the route** to **Brazil** or the **Pacific** asphalted through the western side of Beni

Strategic fit with Brasilagro	—	High operational similarity	Strong vertical synergies	Moderate overlap	Potential strategic acquirer	Global acquirer profile	M&A-driven potential buyer

I. Why Brasilagro Stands Out?

A scalable, diversified, and regionally integrated platform positioned to attract both financial and strategic investors

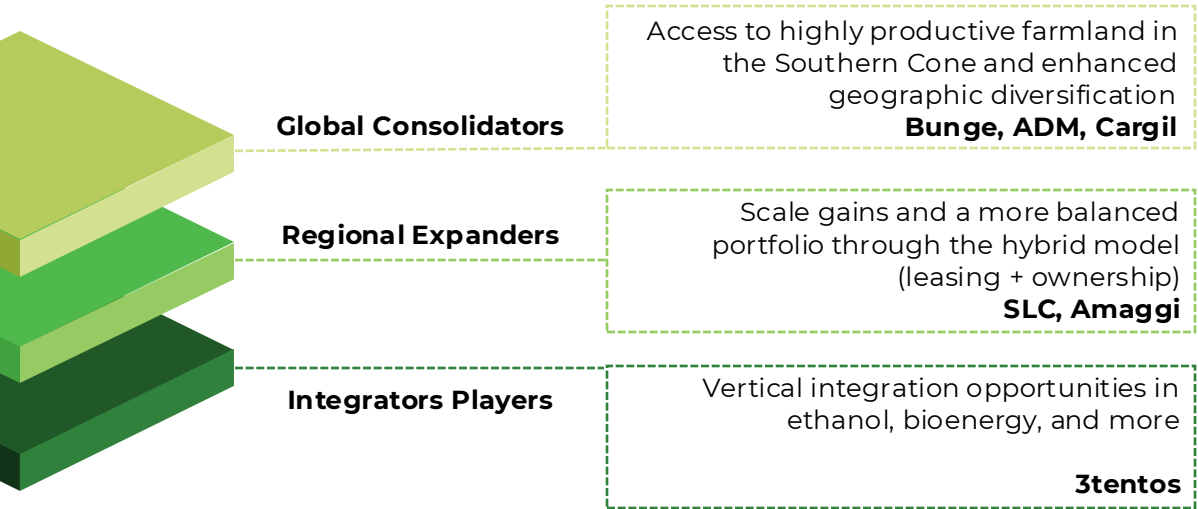

1. **Hybrid land and leasing model** attractive to buyers with capital-intensive structures, enabling scalable growth with lower investment needs.

Regional presence across the Southern Cone creates synergies with existing agribusiness platforms operating in Latin America.

3. **Diversified and scalable portfolio** reduces operational volatility while enhancing efficiency and long-term value creation.

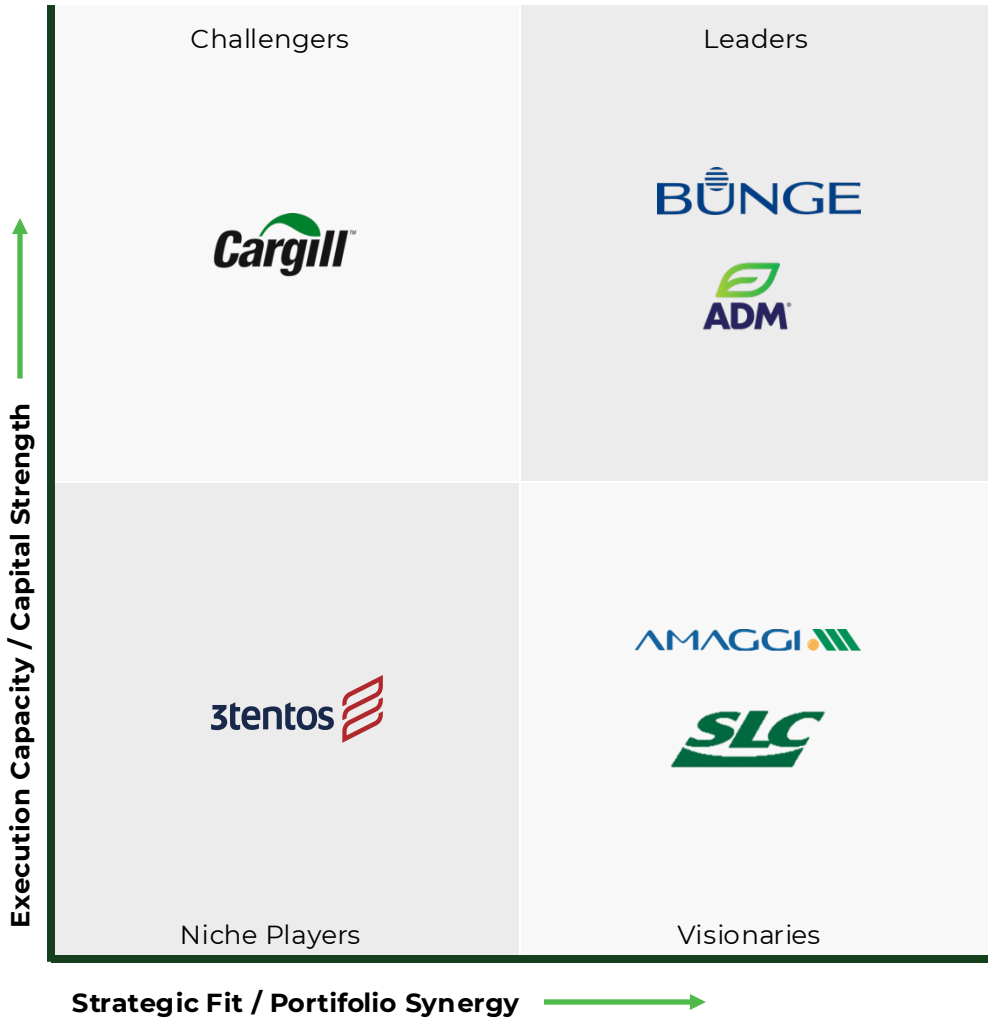

III. Mapping the Strategic Buyer Landscape

Segmenting potential acquirers by growth profile, operational model, and strategic alignment with Brasilagro's value proposition

II. BrasilAgro Buyer Landscape: Strategic Positioning Matrix

Adapted from Gartner's Magic Quadrant framework (Vision vs Execution)

I. Why Brasilagro Stands Out?

A scalable, diversified, and regionally integrated platform positioned to attract both financial and strategic investors
